Tree Experts Orlando Announces Urban Tree Nursery Program Aiming to Produce 1 Million Trees Annually

March 21, 2023

Orlando, Florida - March 21, 2023 -
Orlando, FL - Tree Experts Orlando, a leading tree care and arboricultural services provider in Central Florida, is proud to announce the launch of its Urban Tree Nursery Program, an ambitious project aiming to produce one million new trees annually.

The program is part of the company?s commitment to promoting environmental sustainability, improving air quality, and green urban spaces in Central Florida. It also supports its mission of providing reliable tree care and arboricultural services that will benefit all citizens in the region.

Led by Henley Dianna, CEO of Tree Experts Orlando, the nursery is located in northwest Orange County, just off Highway 441. The facility will house every species of tree native to Central Florida and many tropical varieties. Through the program, experts from Tree Experts Orlando will produce trees with saplings grown from seeds harvested on-site or brought in from other parts of the state.

?We are excited to start this program which will help make our community greener and more sustainable for future generations,? said Ms. Dianna. ?At Tree Experts Orlando, we believe that preserving the health of trees is essential for a healthy environment and community. We hope this program will catalyze others to join us in helping regenerate the natural beauty of Central Florida?s urban forests.?

For more information on how Tree Experts Orlando takes care of planted trees and expands the urban forest, visit its website: https://www.treeexpertsorlando.com/.

To facilitate the program, Tree Experts Orlando has partnered with local schools and organizations to provide educational resources about tree care and arboriculture. These resources will be available online and through various outreach programs. Additionally, the organization plans to host workshops and seminars for citizens interested in learning more about planting and caring for trees.

In addition to producing one million trees annually, Tree Experts Orlando plans to donate thousands of seedlings yearly to local schools, parks, and other public spaces. The company has already started working with local governments and municipalities to identify public areas needing additional trees and greenery.

Ms. Dianna added, ?Trees are the cornerstone of any thriving community, providing shade and oxygen, promoting biodiversity, and mitigating air pollution. We aim to use this program to help revitalize our cities by planting trees that will continue to give back for years.?

Tree Experts Orlando?s urban tree nursery program will begin operations early next month.
