Franklin Tree Service Experts Introduce Biochar Tree Care Program for Soil Carbon Sequestration

March 21, 2023

March 21, 2023 -
Franklin, TN - Franklin Tree Service Experts announced the launch of their revolutionary new Biochar Tree Care Program. This program reduces soil erosion and improves plant health through carbon sequestration. With more than 25 years of experience in the tree care industry, Franklin Tree Service Experts are committed to helping preserve and enhance the environment through innovative tree care practices.

?We are thrilled to be introducing our new Biochar Tree Care Program,? said Mariam Sabrina, CEO of Franklin Tree Service Experts. ?This unique program uses biochar?a soil amendment made from charred organic material?to help sequester carbon and increase soil fertility. It?s important to our commitment to sustainability and environmental stewardship.?

Biochar is a type of charcoal that is created by burning organic matter at high temperatures. The resulting product can then be added to soils for various benefits, including improved water retention, increased nutrient availability, and reduced soil erosion. In addition, biochar helps to sequester carbon, a key component of reducing the impact on climate change.

For more information on how Franklin Tree Service Experts keeps trees healthy and the urban forest safe, visit the company?s website: https://www.treepronashville.com/franklin/.

The Biochar Tree Care Program utilizes Franklin Tree Service Expert?s proprietary blend of biochar tailored explicitly for the needs of each tree. The blend is created with carefully selected ingredients such as wood chips, composted animal manure, and other organic materials. Once the blend is complete, it is treated with a special mixture of beneficial bacteria and fungi, further enhancing its ability to improve soil health.

In addition to the specialized blend of biochar, the Biochar Tree Care Program also includes other essential tree care services, such as pruning and fertilizing. These services aim to promote optimal tree health and

maximum carbon sequestration potential.

?Our Biochar Tree Care Program is just one more way we are working to promote sustainability and protect the environment,? said Sabrina. ?By improving soil health and sequestering carbon, we positively contribute to the global effort to fight climate change. We believe this program will make a difference in our community and beyond.?

For more information about Franklin Tree Service Expert?s Biochar Tree Care Program or any other services, visit their offices at 130 Seaboard Ln, Franklin, TN 37067, United States. Homeowners can also contact the company?s customer support team to book tree maintenance services at 615-808-8224 and sales@treepronashville.com.
