

Fullerton Tree Experts Launches Urban Livability Enhancement Program

March 21, 2023

March 21, 2023 -
Fullerton, CA ? Fullerton Tree Experts is proud to announce the launch of their Urban Livability Enhancement Program. To improve the quality of life for urban dwellers, Fullerton Tree Experts has developed a comprehensive tree care program that includes tree pruning and removal services in addition to tree planting and landscape design. The program is the brainchild of CEO Juan Warren, who saw a need for improved urban livability across Southern California.

"We know from experience how important trees are to the look and feel of any urban area," said Mr. Warren. "We wanted to create a program that would make it easier for cities and homeowners to access our services and incorporate trees into their landscapes to enhance the overall livability of their spaces."

The Urban Livability Enhancement Program is designed to provide cities, businesses, and homeowners with the necessary resources to ensure their trees are healthy, growing, and thriving. It starts with a comprehensive assessment of each site or property, followed by a personalized plan created by one of

Fullerton Tree Experts' certified arborists. The plan may include tree pruning, removal, installation services, and advice on landscape design and plant selection that best suits the space and location.

For information on how Fullerton Tree Experts promotes tree health, visit its website: https://www.orangecountytreeexpert.com/tree-service-fullerton.

"Our goal is to make sure that each property or cityscape we work on looks its best and contributes to improved livability for those who live there," said Mr. Warren. "Whether providing better shade, enhancing privacy, reducing noise levels, or increasing the aesthetic value of a property, we strive to ensure our clients have access to the very best in tree care services."

The Urban Livability Enhancement Program also includes educational resources and informational materials to help homeowners and businesses understand the importance of proper tree care and why it matters. Through seminars, webinars, workshops, and individual consultations with certified arborists, Fullerton Tree Experts is committed to giving back to the community through education and knowledge sharing.

"It's important that people understand the value of trees and how they can contribute to improved livability in their neighborhoods," said Mr. Warren. "By creating an educational forum where people can learn more about trees and tree care, we hope to empower them to take action and ensure their trees are properly maintained."

With over 25 years of experience in urban forestry and tree care services, Fullerton Tree Experts proudly offers their Urban Livability Enhancement Program to Southern California cities, businesses, and homeowners.
