Alpha Therapeutics LLC Offers CBD Products Formulated by Doctors

April 18, 2023

April 18, 2023 -
Alpha Therapeutics LLC, a company based in Paradise Valley, AZ, wants to emphasize that their cannabidiol (CBD) products have been formulated by doctors and really have the amount of CBD as advertised and that it doesn?t contain THC. The company is a white label CBD oil manufacturer that offers CBD oil for relieving pain and anxiety; CBD pain stick for pain in the joints and muscles; cannabinol (CBN) and cannabigerol (CBG) product for better sleep; and a healing balm.

Geoff Dada, CEO of Alpha Therapeutics, says, ?As an ultra runner, my body was constantly being torn down. I began manufacturing CBD using medical quality processes to repair my body and to help my friends. The results were amazing! I was so excited that I shared the product with my friend Tyler Southwell, MD ? a former pole vaulter that suffered from sciatica?horrible back pain. Tyler was so impressed that his pain went away without medication that he asked his patients to try my CBD. That was the beginning of an amazing partnership?working with doctors to formulate CBD products to help their patients.?

The products manufactured by Alpha Therapeutics are made from organically grown hemp and are assured to be fully vegan and free from gluten and GMO products. They always use broad-spectrum CBD with no

THC, which means that there is no need for a medical marijuana prescription to buy or use the products. The quality of the products is assured through strict testing procedures used by the best laboratories in the US. The quality of the products is even backed by a 100 percent money-back guarantee on all purchases. In addition, free shipping is provided to anywhere in the country.

The CBD products may help with body pain, headaches, and stress relief but without the adverse side effects that often come with conventional allopathic medications. It has been noted that the CBD products have the effect of calming the nerve receptors and decrease inflammation. The topical CBD products were developed for localized pain relief for those tired, aging muscles and joints. The topical ingredients are easily absorbed by the skin, which results in quick relief, allowing the user to relax after a long and tiring day. Their sedative formulation, meanwhile, may help those who are having trouble sleeping, allowing them to fall into a deep sleep and then waking up fully refreshed.

CBD is an organic compound naturally found in the flower of the cannabis plant, which has been used for medical purposes for thousands of years. It is important to point out that CBD is different from tetrahydrocannabinol (THC), which is the main psychoactive compound found in cannabis that causes a person taking it to experience that ?high? or euphoric feeling. Some CBD products may also contain THC and they are known as full spectrum products. However, the products offered by Alpha Therapeutics are broad spectrum CBD, which does not contain any THC.

CBD has been noted to have a broad range of potential benefits such as offering help with anxiety, depression, stress, pain, inflammation, and epilepsy. CBD is regarded as generally safe and it is not fully regulated at the federal level by the government.

Alpha Therapeutics LLC was founded by Geoff Dada to ensure that the CBD products offered have been manufactured using medical quality processes to ensure that the products contain the amount of CBD they are supposed to contain. He partnered with Dr. Tyler Southwell, MD, who was the first to try his CBD product for the back pain he was suffering from. Dr. Southwell was so impressed with how the pain disappeared without having to use medication that he also recommended the CBD product to his patients. Currently, Dr. Southwell serves as advisor for Alpha Therapeutics along with Eliza Jones-Hedrick, RN, MSN.

Those who are interested in learning more about the CBD products formulated by doctors can check out the Alpha Therapeutics LLC website or contact them on the phone or through email.
