Rehab Near Me Makes Finding Addiction Treatment Easy & Convenient

April 26, 2023

Los Angeles, California - April 26, 2023 -
A US database of rehabilitation centers called Rehab Near Me helps people find addiction treatment close by. The company streamlines the process of finding addiction treatment by giving users the ability to search treatment options based on category, addiction type, treatment type, and insurance and private pay options. The company wants prospective clients to know that in addition to helping them find resources to treat their addiction, they are doing a push to offer mental health services, too.

Company representative James Thomas says that mental health issues are usually the root for all addictions.

?Addictions are typically coping mechanisms in response to a traumatic event, whether emotional or physical,? Thomas says. ?People can have a genetic predisposition to addiction, and they could have lived through an addiction triggering event. When a person?s mental health is in trouble, their likelihood of developing an addiction increases 10-fold.?

By highlighting the importance of mental health, it changes how addiction is discussed. Instead of seeing people in recovery simply as addicts, understanding the mental health challenges addicts face can humanize them. This is why the company is working with a number of mental health professionals and facilities who can offer a more comprehensive treatment plan for people in recovery.

On the website, users can search for rehabs that are luxury, exclusive, holistic or pharmaceutical led, facilities that offer detox support, faith-based support, inpatient or outpatient, dual diagnosis, veteran rehab coverage, treatment for veterans, treatment for students, and more. This ability to personalize treatment needs gives users the peace of mind that they are choosing the best option for them.

?It can be hard to choose the right facility, especially while in the throes of an addiction,? says Thomas. ?We want to make it easy and convenient for our clients to find the help they need.?

According to the Rehab Near Me website, drug and alcohol addiction are on the rise. Some of this is attributed to growing anxiety from the Pandemic, the unstable economy, the threat of global catastrophes, and social media use. Feeling overwhelmed, stressed, and hopeless are emotions that can drive a person to addiction. Additionally, dealing with grief, loss, and change can trigger addiction.

?Addiction is not black or white,? says Thomas. ?We know that complex mental disorders are hiding behind every addiction, so it?s our goal to help people learn about the various mental health treatment options available. So that they don?t feel alone in the fight.?

Being able to afford addiction treatment is why many never seek out treatment. Most people feel that addiction treatment is only for wealthy people who have limitless resources. However, Rehab Near Me catalogs dozens of treatment centers that accept a variety of insurances. Insurance makes treatment more affordable, and in some cases, completely removes the financial burden of paying for treatment.

?Our customers are often surprised by how affordable some treatments are,? comments Thomas. ?No matter your financial situation, treatment options are available. No one should let money stop them from getting the help they need.?

Whether seeking inpatient drug rehab, or outpatient drug/alcohol rehab, there are plenty of services available. The database shows clients the closest facilities near them that offer exactly what they?re looking for.

?Finding the right treatment center is the first step on the road to recovery,? says Thomas. ?Having this resource available takes a lot of stress and confusion out of the process.?

Many treatment centers offer 30, 60 and 90 day programs. These facilities provide 24/7 medical care and supervision, which can help patients stay on track. After treatment ends, some facilities offer aftercare treatment to keep in touch with patients, and ensure that they remain sober.

?For some people, those first 30 days are all they need to get better. But for others, it?s a great way to get their foot in the door, and establish better habits. Whatever a patient needs, we can help them find the right treatment.?

If patients do not know what treatment is best for them, they can always speak to an intake specialist who can recommend treatment options.
