Country Towne Offers Economical Roll Form Metal Roofing Services to Ontario Residents

April 18, 2023

April 18, 2023 -
Country Towne, a metal roofing and siding material supplier based in Chatham-Kent, Ontario, is offering local property owners the many cost-saving benefits of on-site rolled roofing.

Metal roofing is preferred by homeowners and business owners who value longevity and durability. With minimal maintenance, metal roofs have been known to last for over 40 to 50 years. Unlike asphalt shingles, metal roofing does not degrade over time and offers much better weather resistance too.

However, the cost of the panels and the installation makes metal roofing a more expensive option when compared to other roofing materials. While asphalt shingles cost anywhere from $1 to $2.5 per square foot, standing seam metal roofing starts at $2 per square foot and goes up to $4 per square foot.

?Country Towne offers a solution to make the cost of metal roofing more economical,? the spokesperson for the Ontario building materials supplier says. ?Our seamless panels are rolled on-site eliminating a lot of the costs associated with procuring and transporting metal roofing. The result is greater savings that we directly pass on to you, our customers.?

The panels from Country Towne are seamless from the eaves to the ridge and are roll-formed right on location. They remove the need for a lap joint regardless of their length, which can be anywhere from 4 to more than 60 feet. Moreover, the Snap Lock & Standing Seam design of the panels reduces the chance of roofing failure due to pressure on the roofing seams. Using hidden fasteners also further prevents leaks.

Since the panels are rolled on the project site, there is no need for packaging such as shipping crates. Customers get to enjoy factory direct pricing and don?t have to spend money on warehouse storage expenses. Unlike traditional metal roofing, customers don?t have to pay the transportation costs for a flatbed truck to bring the seamless panels to their site. Finally, the loading and unloading process of the panels is

also simplified, eliminating lift truck mishaps.

The spokesperson for the Ontario metal roofing company summarizes the benefits of its roll form metal roofing solutions by saying, ?Our new initiative is one of the most flexible and affordable metal roofing options available to our residential and commercial customers. Last minute length changes can be easily accommodated, wastage is minimized as existing panels don?t have to be cut and can be made to a specified length, and the overall process is sped up and streamlined.?

Country Towne offers competitive pricing for its standing seam metal roofing that can be verified at any time using its up-to-date online Bendex portal. The company provides all the help its clients need to understand rates and secure financing. Quotes are based on the customer?s material list. Lead times are less than a week and custom trims are available in a day or less.

Ontario residents have given Country Towne the thumbs up for its value metal roofing services. Apart from noting the affordable pricing of its roll-form metal roofing, clients also praise the company?s customer service, the professionalism of the installation crew, and the dedication to delivering projects on time. On its Google Business Profile, the business has a near-perfect rating of 4.9 out of 5.0 from over 30 reviews.

One recent customer review says, ?I used Country Towne Metal Roofing on my home. I highly respect their response time to come and install the steel roof. It was a difficult 10/12 pitch roof. Job well done. Very much appreciated. I definitely recommend this company. We have had many compliments on the roof.?

Another customer writes, ?We had a friend recommend them. They were very professional and upfront with prices and choices. The workmanship was second to none. Don't let the young crew make you believe differently. I have had many positive comments from neighbors.?

Readers can contact Country Towne at (888) 674-6570 or write to it at info@countrytowne.ca for further inquiries about its roll-form metal roofing services.
