

Houston Tree Service Experts Partners with Local Musician to Create Album Made Entirely of Tree Sounds

April 03, 2023

April 03, 2023 -
Houston, TX - Houston Tree Service Experts has announced a unique partnership with a local musician to create a one-of-a-kind album made entirely of tree sounds. The project was launched in March of 2023 as part of Houston Tree Service Experts' commitment to environmental preservation and promoting tree conservation and sustainability.

"We wanted to find a way to celebrate our trees meaningfully," says Laverne Finn, CEO of Houston Tree Service Experts. "We are passionate about helping people understand why preserving our trees and forests is so important for future generations. This album is an incredible opportunity to bring the beauty of nature into people's lives through sound."

The album, "Songs from the Trees," comprises ten original songs crafted from the sounds of trees in their natural environment. Using advanced recording technology and creative sampling techniques, each song

captures the unique character of the trees while bringing life to the artist's unique musical vision.

"We often think of trees as silent sentinels, standing tall and strong in the face of whatever life throws their way," says Finn. "But in reality, they constantly communicate with us - through the rustle of their leaves, the creak of branches, and the wind whisper."

To create the album, Finn spent several months in the field, listening closely to the various sounds that trees make. He then recorded these sounds and used them as the basis for his music. Then, with the help of a team of experts from Houston Tree Service Experts, he was able to identify and accurately capture the many nuances of each tree's personality.

"I wanted the album to be more than just tree noise," says Finn. "I wanted each song to tell a story and evoke emotion. So every track is like a miniature painting or poem - it captures something special about each tree and brings it to life in sound."

Since its release, "Songs from the Trees" has received critical acclaim from music critics worldwide. In addition, Houston Tree Service Experts has been praised for its innovative approach to promoting tree conservation. As Finn explains: "This project exemplifies how we can use creativity and technology to bring attention to important issues like tree conservation. I'm proud to be a part of this effort and hope it will inspire others to act and help protect our planet's precious forests."
