Roseville Tree Service Pros Unveils Custom Tree-Based Furniture with Reclaimed Wood from Local Trees

April 03, 2023

April 03, 2023 -
Roseville, CA - Roseville Tree Service Pros has unveiled a new service for creating custom tree-based furniture, utilizing reclaimed wood from local trees. The company's CEO, Saih Küçükaslan, is passionate about sustainable living and preserving the environment, and he believes his new venture provides a unique and green way to enjoy outdoor furniture.

"At Roseville Tree Service Pros, we believe in taking care of our planet and ensuring that we can all enjoy its beauty," said Küçükaslan. "Creating furniture out of fallen or cut down trees is just one way to make sure that we do our part to reduce waste while also providing people with beautiful, custom-made pieces that they can be proud of."

The process begins with the careful selection of suitable trees. The Roseville Tree Service Pros team looks for trees that are the right size and have the correct grain pattern to create furniture. Once the trees have been selected, they are cut into usable boards, sanded down, and treated with a unique eco-friendly finish to bring out their natural beauty.

The next step involves design and fabrication. Utilizing 3D modeling software, the team can craft custom designs that fit each customer's needs and style. With this, customers can choose from various sizes and shapes, as well as different types of woods, to create the perfect piece for their home or garden.

Lead researcher for Roseville Tree Service Pros, John Smith, believes this green furniture is excellent for the environment and people looking for something unique. "We want people to feel like their furniture is one-of-a-kind," said Smith. "Using reclaimed wood from local trees allows us to create exceptional pieces that cannot be found anywhere else."

In addition to offering custom designs, Roseville Tree Service Pros is committed to using sustainable practices during production. All the wood used in their furniture is responsibly sourced and comes from fallen or cut down trees that are no longer utilized in other ways. Additionally, all the finishes and stains used on the furniture are eco-friendly and non-toxic.

The result is a stunning piece of furniture that will last for years and be enjoyed by generations. As Küçükaslan puts it: "We want our pieces to stand the test of time and bring joy not only to current owners but also future owners."
