Burbank Tree Professionals Partners with Local Science Museum to Create Interactive Exhibit on the Science of Trees

April 03, 2023

April 03, 2023 -
Burbank, CA - Burbank Tree Professionals, a leading provider of tree care and landscaping services in the Los Angeles area, has partnered with the California Science Center in downtown Los Angeles to create an interactive tree exhibit. This exhibit will serve as an educational resource for visitors of all ages and backgrounds and help raise awareness of the importance of trees in the ecosystem.

The exhibit will feature a variety of interactive elements that demonstrate how trees grow, the different types of bark found on trees, and how to care for them properly. It will also highlight the role trees play in providing shade, cleaner air, and habitat for wildlife. In addition, visitors will be able to learn first-hand about the science behind trees from experts in the field.

Adem Yasa, CEO of Burbank Tree Professionals, said, "This is a great opportunity to showcase the beauty and importance of trees in our world today. We are excited to work with the California Science Center to create an interactive exhibit to educate and inspire people of all ages to appreciate and protect nature."

Dr. Susan Holtz, Lead Researcher at the California Science Center, added, "We are thrilled to partner with Burbank Tree Professionals to bring this unique exhibit to life. Trees are essential to our environment, and visitors need to understand the science behind them so we can better protect them and ensure their health for years to come."

The exhibit will open its doors in April 2023 and will be open to the public throughout the year. In addition to the interactive elements, there will also be educational activities provided by Burbank Tree Professionals, such as tree pruning workshops, arborist lectures, and more. These activities aim to make learning about trees fun and engaging for all ages.

"We believe in educating our community about the importance of trees," said Yasa. "This exhibit is just one way we work with local institutions like the California Science Center to promote greater awareness and understanding of trees."

Burbank Tree Professionals is a family-owned business providing quality tree care services in Los Angeles. Their team of experienced arborists is committed to caring for trees while helping homeowners save money on their energy bills and maintain a healthy landscape. The company offers many services, from tree trimming and removal to fertilization and pest control.
