Atlanta Tree Service Experts Launches Tree Education Initiative with Creation of Tree-Based Board Games

April 03, 2023

Atlanta, Georgia - April 03, 2023 -
Atlanta, GA - Atlanta Tree Service Experts, a tree care company servicing the greater Atlanta area, has launched an innovative new initiative to bring tree education to the community. The initiative is centered around creating board games using local species of trees to teach people about the importance of tree care and conservation.

The idea was born out of Atlanta Tree Service Experts' CEO Elliot Craven's passion for educating the public on trees' value and helping ensure their longevity. "As an arborist, I have a vested interest in ensuring trees are healthy and thriving," said Mr. Craven. "This initiative allows us to use our knowledge and expertise to create something special that will help educate and engage people in the importance of tree care."

The game will feature ten native tree species from the region, including red maple, white oak, and loblolly pine. It will utilize scientific facts about each species and fun interactive elements designed to teach players about the role trees play in our environment. Players will be able to learn how to identify different species, how to care for them properly, and how they can contribute to a healthy ecosystem.

"We hope that by creating this game, we can inspire others to take action in preserving these essential resources," said Mr. Craven. "We want this to be an enjoyable experience that helps people develop a deeper understanding and appreciation of trees."

Atlanta Tree Service Experts plans to launch the game later this year, with plans to sell it at local stores and online. In addition, Atlanta Tree Service Experts is exploring opportunities to partner with schools and other

organizations to host events where the game can be played.

"We're excited about this project," said Mr. Craven. "It's something we've been dreaming about for a long time, and now we finally have the chance to make it happen. We think it could be a great way to get more people involved in tree conservation, and we look forward to seeing how it's received when it launches."
