Tree Service Experts Lexington Introduces High-Tech Equipment for Precision and Safety

April 03, 2023

Lexington, Kentucky - April 03, 2023 -
Lexington, KY - Tree Service Experts Lexington, a leading tree care company in the region, is proud to announce that they have implemented high-tech tree removal equipment for precision and safety. The new technology will allow them to remove trees effectively without causing any damage to the surrounding environment.

The new equipment, equipped with advanced sensors and cutting-edge cameras, helps Tree Service Experts Lexington maintain the highest safety and precision when removing trees. With this technology, they can ensure their work is done quickly and efficiently while minimizing the risk of injury or property damage.

"We are thrilled to introduce this cutting-edge technology to our customers," said Burton Lanes, CEO of Tree Service Experts Lexington. "Safety is always our top priority, and this equipment ensures we can provide the best service possible."

The high-tech tree removal equipment includes various tools designed to make the tree removal process safer and more accurate. For instance, one of the pieces of equipment uses lasers to measure the trunk diameter of each tree before it's removed. This allows Tree Service Experts Lexington to ensure that they don't accidentally cut down a tree that is too large or too small. Additionally, they have invested in robotic arms that can be used to lift and move heavy trees with minimal effort safely.

Other equipment includes cameras mounted on drones and poles that allow them to inspect trees from multiple angles. These cameras are equipped with sophisticated image recognition software that gives Tree Service Experts Lexington a better understanding of the structure of each tree before it is removed.

In addition to the high-tech equipment, Tree Service Experts Lexington has also implemented a series of procedures to ensure the safety of their employees and customers. For example, all staff members must wear protective gear and complete rigorous safety training before working on any job site.

"We take safety very seriously," added Lanes. "That's why we've implemented these precautions; so that our staff is always prepared for any situation. We want to ensure everyone is safe while providing our services."

Tree Service Experts Lexington is committed to providing quality tree care services while maintaining safety and efficiency. With their new high-tech equipment, they can confidently remove any tree while protecting people and property.
