Hanson Chiropractic & Massage Clinic in Seattle Introduces Advanced Chiropractic Care Technology

April 03, 2023

April 03, 2023 - PRESSADVANTAGE -

Seattle, WA: With the leadership and guidance of Chiropractor Dr. Hanson, a local chiropractic clinic in Seattle is making waves in providing quality services for patients. Hanson Chiropractic & Massage center uses over 20 years of experience to diagnose spine-related issues, create a tailored treatment plan for each patient, and provide gentle and practical techniques for restoring health and well-being.

One thing that makes Hanson Chiropractic & Massage clinic stand out is its advanced equipment for catering to various chiropractic needs, like digital orthotics. Digital orthotics utilizes cutting-edge 3DO technology to capture accurate three-dimensional images of the foot during standing and movement, enabling the precise determination of a patient's posture, mobility, and foot arches.

The captured data are gathered in a 7-Point assessment report, which includes weight distribution, high-pressure areas, body balance, mass displacement, gait phases, and symmetry. It is a crucial tool for chiropractors to accurately diagnose and treat misalignments or pains in the feet, knees, hips, back, or neck.

On top of that, they also promote Sound Assisted Soft Tissue Mobilization (SASTM). The SASTM method is

a technique of using instruments to mobilize soft tissue. Sound waves will locate restrictions in soft tissues and target them with an appropriate amount of pressure. This treatment helps restore normal movement and reduce pain, tightness, or inflammation.

Other holistic treatments offered by Hanson Chiropractic & Massage include nutrition advice, exercise programs, and lifestyle changes to help patients live healthier lives. The patient's health is the top priority, and they strive to provide an exceptional experience each time. The combination of these chiropractic techniques, along with the knowledge and experience of Dr. Hanson, make the clinic the premier choice for chiropractic care in Seattle.

With life-changing results and top-of-the-line patient support, people can trust expert Chiropractor Dr. Hanson and his team for reducing their pain and getting back in top shape.
