Wichita Tree Service Pros Teams Up With Local Roaster to Create Unique Coffee Experience

April 04, 2023

April 04, 2023 -
WICHITA, KS - Wichita Tree Service Pros and local coffee roaster Morning Rise Brew are teaming up to bring a unique coffee experience to Wichita. The two companies have developed an innovative blend of premium locally harvested beans, tree nuts, and spices that provide a one-of-a-kind flavor profile. This is the first time a tree service company has partnered with a local roaster to create a unique product, allowing customers to enjoy an exceptional cup of coffee.

Nelson Qualls, CEO of Wichita Tree Service Pros, spearheaded the collaboration between his company and Morning Rise Brew. "We're excited to be working with Morning Rise Brew to bring this unique and delicious coffee experience to our customers," said Qualls. "This partnership allows us to combine our knowledge of trees with the expertise of a local roaster to create something exceptional."

The new blend features locally sourced beans carefully selected for their quality and interesting flavor profile. The beans are combined with tree nuts and spices to create a smooth and balanced flavor, unlike any other coffee. The resulting brew is described as full-bodied with chocolate, almond, and hazelnut notes.

In addition to providing customers with a unique coffee experience, Morning Rise Brew and Wichita Tree Service Pros are dedicated to sustainability. All of the ingredients in the blend are sourced from local farmers who practice sustainable agricultural methods. Furthermore, the packaging used for the coffee is made from sustainably sourced materials that can be easily recycled.

"We are passionate about creating coffee that is not only delicious but also sustainable," said Qualls. "Our

goal is to leave as small of an environmental footprint as possible while still providing our customers with an amazing product."

The new blend will be available at Morning Rise Brew's retail and online stores. Customers can expect to find the same great flavor profile in each coffee cup. In addition, customers will receive a free tree sapling when they purchase five or more bags of the new blend.

Wichita Tree Service Pros believes this new coffee will be an ideal opportunity to communicate the importance of trees to Wichita's residents. The company plans to use the coffee packaging to spread information on caring for trees and preserving native trees in the area. Also, the company's CEO believes that when more people start seeing trees as a great source of tasty beverages, they will be more inclined to invest in tree maintenance and care.
