

Architecture Firm and Tree Service Pros Fair Oaks Partner to Create Sustainable Tree-Based Building Design

April 04, 2023

April 04, 2023 -
Fair Oaks, CA - Tree Service Pros Fair Oaks announced an exciting new partnership with a local architecture firm this week to create a sustainable tree-based building design. Tree Service Pros Fair Oaks CEO, Lydia Johnson, made the announcement at the grand opening of the company's new office in Fair Oaks, California.

"At Tree Service Pros Fair Oaks, we are committed to creating innovative solutions that provide long-term sustainability for our environment," said Johnson. "This partnership represents another step forward in our mission to promote green living and reduce our carbon footprint."

The partnership between Tree Service Pros Fair Oaks and the architecture firm will focus on creating buildings built using trees and other natural materials. The goal is to create a visually appealing and functional structure while also being eco-friendly. In addition to using sustainable materials, the designs will include features such as rainwater collection systems and solar energy harvesting.

"We are excited to be working with Tree Service Pros Fair Oaks on this project," said Julius Richards, Head of Urban Planning of the architecture firm. "We believe this partnership has the potential to revolutionize the way we think about constructing buildings. By utilizing natural materials like trees, we can create an aesthetically pleasing and environmentally conscious design."

Tree Service Pros Fair Oaks has provided tree services for over 15 years, specializing in complete tree care from planting to removal. As part of their commitment to sustainability, they have recently begun offering eco-friendly pruning and tree preservation services. Their expertise in tree care makes them a perfect partner for this project.

"We recognize the importance of preserving our natural resources," said Johnson. "That's why we are so passionate about this project. We want to show that it is possible to build structures from natural materials while maintaining the highest quality and safety standards."

The architecture firm plans to begin work on the project in the coming months. They anticipate having a prototype completed by the end of this year. After that, they hope to expand the project and create more sustainable tree-based building designs if successful.

"This project is just one step towards creating a greener future," said Johnson. "We look forward to continuing our partnership with the architecture firm and making an impact in our community."
