New Solar Powered LED Desk Lamp Launched

December 07, 2015

December 07, 2015 - PRESSADVANTAGE -

Product Zzar, a business based in Billerica, MA, has announced the launch of their new portable solar powered LED desk lamp. The lamp is suitable for a wide variety of applications. Despite having only recently been released, it is already creating quite a buzz.

"We love how well people are receiving our product," says P.J. Beaulac from Product Zzar. "We wanted to create something that was useful and efficient in a wide variety of applications and that could really improve people's lives. This is one of the reasons why we made it solar-powered as well, so that it does not have a negative impact on the environment as a whole."

The LED desk study lamp is provided with a dimmable bulb. It is also fully foldable, which makes it suitable for taking along on camping trips, for instance. It also functions as a lantern, which can be used for those who have to do emergency work or any other kind of work at night. Some people have even started using it as a flashlight.

Since its release just a few days ago, it has already attracted numerous positive reviews. "This is the best solar powered/USB powered desk lamp I ever owned," says Roshan Chanaka. "It took only three days to arrive after I ordered. It is very very portable for any place. I use this near my bed, but it can be use for

reading, emergency, camping etc... My wife loves it and she wants another one near her working table. So I'm gonna order for another one. So far there is no any problem."

The light features a dimmable 3 watt 300 lumen LED light, which provides continuous lighting for between five and 13 hours. It has the ability to be charged through solar, USB and AC and has a 2 watt solar panel included. It can also be used as a charging station for digital portable devices. These include cell phones, iPads, cameras, MP3 players and so on.

The company is encouraging those who are interested to give them a 'Like' on their Facebook page at <https://www.facebook.com/lightingzzar/>.
