

Dr. Mark Hickman, Who Offers Vasectomy Reversal at Affordable All-Inclusive Cost, Gets Another Five Star Review

April 14, 2023

New Braunfels, TX - April 14, 2023 - PRESSADVANTAGE -

Dr. Mark Hickman, MD, FACS, a microsurgery expert in New Braunfels, TX, is proud to announce another five star review that was earned from a satisfied patient. In this review, Brad P. said, "Very hospitable and was comfortable through the whole procedure." Currently,

Microsurgical Vasectomy Reversals by Dr. Mark Hickman has an overall rating of 4.8 out of 5 stars. Dr. Hickman offers two all-inclusive alternatives for vasectomy reversal. One is priced at \$3,300 and this includes an oral sedative and local anesthesia. The other alternative is priced at \$4,200 and the procedure will be done under IV sedation, which is provided by a board-certified anesthesiologist.

Dr. Hickman says, "For those who are asking, 'Is it possible to reverse a vasectomy at an affordable cost?' we have made this possible through our two all-inclusive options. With this all inclusive fee there are no surprises. You can call us for a free consultation. Also, if you happen to be traveling from another state, you can ask our office manager Pat for our discounted hotel rates here in beautiful New Braunfels, Texas."

Patients coming from other places all over Texas and from other states such as Louisiana, Oklahoma, etc., can take advantage of the special hotel accommodations arranged by Dr. Hickman through partnerships with several local hotels. His patients can save as high as 50 percent of their hotel costs when staying in those hotels.

It is important to note that New Braunfels is a tourist town, which means out-of-town patients may be able to hit two birds with one stone. This town has two beautiful rivers running through the community, which are the Comal River and the Guadalupe River. Also found in New Braunfels is Schlitterbahn, which happens to be the biggest water park in the country. It offers a whole day of entertainment for all kinds of people. Thus, those who are interested in reversing a vasectomy can go to New Braunfels and also enjoy the views while there.

The procedure to be used by Dr. Hickman involves the microsurgical repair of the vas deferens through the use of a powerful operating microscope and fine nylon suture. The goal is to align the lumen of the two ends of the vas and connect them with watertight closure to ensure a high success rate. Dr. Hickman will make a small incision on each side of the scrotum and search for the two ends of the vas deferens and free them from the scar tissue.

Dr. Hickman will take a fluid sample from the testicular end of the vas deferens and he will examine it under a microscope. There are three possibilities here. The first one, which is the best possible situation, is that the sample fluid contains whole sperm. The second possibility is that the fluid is thin and contains only sperm parts. The third possibility is the fluid is thick and pasty and doesn't contain any sperm. This third situation indicates an obstruction that is known as an epididymal blowout. A vasoepididymostomy will need to be done in addition to the vasovasostomy. No additional charge will be made even if both procedures have to be done.

Dr. Hickman has expertise in laparoscopic methods and has also invented various surgical instruments. He has been awarded a US patent and has been given recognition for his contribution to a number of vital minimally invasive patents.

Dr. Mark Hickman obtained his residency training in general surgery from the University of Texas Health Science Center at San Antonio. It was during this period of time, which lasted for five years, that he discovered the microsurgery methods used by plastic and reconstructive surgeons. It did not take long for him to realize how the minimally invasive procedure can enhance the experience and the results for his patients. It was then that he decided to focus on the use of microsurgery for his practice that specializes in vasectomy reversal for men who want to regain their ability to father a child again.

Those who are looking for a vasectomy reversal surgeon can check out the Microsurgical Vasectomy Reversals by Dr. Mark Hickman website or contact them through the telephone or via email. The practice is open from 8:30 am to 5:00 pm, from Monday to Friday.
