

EPS Landscaping & Tree Service LLC Offers Lawn Care, Tree Trimming and More

April 19, 2023

Pembroke Pines, Florida - April 19, 2023 -
EPS Landscaping & Tree Service LLC is offering tree trimming service in Pembroke Pines, FL, and other tree care, lawn care, and landscaping services. EPS offers a wide range of services for Broward County, such as: sod installation, tree services, landscaping, tree relocation, stump grinding, hardscaping, commercial services, lawn care services, commercial landscape services, sprinkler repair, landscape design, palm tree trimming, landscape maintenance, pool scaping, lawn insect control, tree pruning, tree removal, retainer walls, lawn mowing, emergency tree removal, tree planting, lawn maintenance, and sprinkler system installation.

Tree trimming is essential because the branches of trees may grow too long and cause a lot of potential problems, such as blocking the sunlight for some plants in the garden. Trimming a tree can also make it look better. A tree branch that has grown too long may also pose risks of touching electric lines or a property. A tree surgeon from EPS will be able to determine how to trim the tree safely and without causing harm to the tree. Tree pruning is also vital when a tree branch is dead or severely damaged. These branches have become weak and are in danger of breaking and falling down on people and property.

Meanwhile, in Broward County, FL, palm tree trimming is also a service that is in demand. Palm trees are well suited to the warm weather in Florida and palm tree trimming is needed to shape the foliage if it has become overgrown. Dead fronds also need to be cut off not just because they are a eye sore but also because they can be a fire hazard. An expert tree trimmer from EPS will know the optimal procedure for trimming a palm tree.

EPS Landscaping & Tree Service also provides services for commercial landscape design. These services have the purpose of enhancing the curb appeal of the commercial property and boosting its market value. The improved aesthetics of the commercial property will not just increase the property?s value but it will also attract clients and help retain them. Customers will naturally be attracted to a business in a commercial property that has attractive landscaping.

The plants and trees to be placed around the commercial building can also improve the privacy and security of the company. In addition, an attractive commercial landscape indicates that the business is one that truly cares for the environment. This can attract more customers, particularly those who prefer to do business with companies that have environmentally friendly practices. The plants and trees around the commercial building will also contribute to an enhancement of air quality, which is also beneficial for all employees, visitors and clients.

Meanwhile, at Broward County, tropical landscaping will likely be preferred because of Florida?s humid climate and region, which offers the best environment for the unique and attractive tropical landscape that depends on large part on tropical plants. This requires the expertise of the landscaping specialists at EPS because tropical landscaping can be more complex to map compared other landscaping types because of the use of various type of plants that need different methods of care. A tropical landscape often have: water features like a small waterfall or a pool; large, vibrant leaves; lava rock; and island decor like tiki torches or hanging lights.

EPS Landscaping & Tree Service is a family owned and operated company that has been providing lawn care, tree care, and landscaping services in the Broward County area for more than 20 years.
