Elite Dental Provides Porcelain Veneers in San Antonio TX

April 19, 2023

April 19, 2023 -
Elite Dental wants to highlight their porcelain veneer service in San Antonio, TX, and neighboring areas. The porcelain veneer is part of their cosmetic dentistry services and is often preferred by patients who a require fast but long-term solution for a whiter and more beautiful smile. Porcelain veneers are made of thin shells of porcelain that are bonded to the front of the teeth, offering an immediate transformation. At Elite Dental, Dr. Mohan Raj Jaganathan and Dr. Veena Raja only use the finest quality porcelain materials, such as Emax and zirconia, to ensure a durable and natural-looking smile.

Their skilled and experienced cosmetic dentists will help the patient decide if veneers are appropriate for them. These dental veneers can be used to correct a number of dental issues, such as: gaps and spaces between teeth; old fillings that have become unattractive; broken, chipped and damaged teeth; tooth that looks too small; slightly crooked or oddly shaped teeth; yellow, discolored or stained teeth; and teeth that fail to respond to whitening treatments.

Meanwhile, the high quality of the services provided by Elite Dental is attested to by the highly positive reviews they have been receiving. For example, Clara S. has given them a five star rating and said, ?I was embarrassed and even a little nervous. But within minutes I was feeling relaxed because of how I was treated. They listened and promptly addressed my concerns. I told them what I wanted done and they didn't try to push other treatments on me, everything was explained to me in a way that was very understandable. They made sure that I was comfortable and pain free during my procedure. Dr. Mohan and his assistants are awesome they did a wonderful job. I left their office with confidence knowing that I wouldn't be embarrassed to smile anymore. I greatly recommend Dr. Mohan.? They currently have an overall rating of 4.8 out of 5 stars after receiving more than 160 reviews.

Porcelain veneers can also help in protecting the teeth from further damage or decay, thus allowing the patient to maintain oral health. For those who are not happy with how their teeth look, dental veneers may be

the appropriate solution to transform the patient?s smile and offer a new sense of self-esteem and confidence.

The process of providing the dental veneers at Elite Dental starts with a comprehensive examination of the patient?s teeth by the cosmetic dentist. This will help the dentist in determining the best way to position the dental veneers. The next step is for the dentist to take an impression of the teeth and fashion a model of the patient?s teeth. This will ensure the veneers made will fit the patient?s teeth perfectly. Once the veneers are ready, the dentist will prepare the teeth by getting rid of any decay or some of the enamel to make sure the veneer will sit flush with the teeth. The dentist will then use a special adhesive to bond to the veneer to the tooth.

Elite Dental practitioners Dr. Mohan Raj Jaganathan, DDS BDS MPA and Dr. Veena Raja, DDS BDS MS PhD are focused on providing the highest level of dental care for their patients. The facility in San Antonio Texas is equipped with cutting edge dental technology to provide the most effective and comprehensive treatment possible.
