

# Four Points Dental Studio Provides Porcelain Veneers in Austin Texas

*April 19, 2023*

April 19, 2023 - PRESSADVANTAGE -

Four Points Dental Studio wants to emphasize their porcelain veneers service in Austin and surrounding areas. They are ready to set up a consultation with a patient to discuss how dental veneers may help in enhancing their smile. These are like thin wafers that are placed on the surfaces of the teeth to cover up stains, cracks, blemishes, and other problems. During this initial consultation, they will assess the suitability of the patient for dental veneers and discuss the various issues and goals and examine all of the alternatives for cosmetic and restorative treatment.

The high quality of the services provided by Four Points Dental Studio is confirmed by the highly positive reviews they have been receiving from satisfied patients. For instance, Noemi B.C. has given them a five star rating and said, "The front desk team, to dental hygienist, to my dentist was so nice, professional. Didn't feel like corporate, almost like family taking care of me. No wait time and teeth feel squeaky clean. Highly recommend to be a new patient. I didn't have any cavities, plaque, or dental work needed so easy service with not complications. Thank you team. My husband will schedule his annual dental exam with your team."

There many advantages offered by porcelain veneers. First of all, they are versatile, which means they can be used as remedy for various small cosmetic issues. For instance, dental veneers can be used to close the gaps between front teeth. Or veneers may also be used to cover up any chips or cracks on the teeth that can ruin a person's smile. Second, dental veneers can be customized to appear and feel natural in the mouth. This can add to the self-esteem and self-confidence of the patient.

Third, porcelain veneers can be used to protect tooth enamel. They will only need to remove a thin layer of the enamel when placing them on the teeth. It is a non-invasive procedure and will not even require any local anesthesia. Lastly, dental veneers may help in preventing the discoloration of the teeth from returning.

During the initial consultation, the Four Points Dental Studio cosmetic dentist will perform a comprehensive

exam of the patient's teeth. This assessment will be helpful in determining the most appropriate way to place the veneers. After the examination, the dentist will then take an impression of the teeth in order to create a model of the teeth. This model will be used to make sure the customized veneers will fit snugly to the teeth. After the veneers are finally made, the dentist will prepare the patient's teeth to make sure the veneer will be bonded firmly to the teeth. The dentist will remove any decay and some of the enamel to make sure the veneer will be strongly bonded to the teeth. A special adhesive is used to affix the porcelain veneers to the teeth.

Four Points Dental Studio is focused on providing patient-centered dental care with the goal of nurturing long-lasting relationships with their patients. They make sure to provide a welcome atmosphere at their west Austin dental office. Knowing fully well how many patients are reluctant to visit the dentist, they will ensure that the visit will be as stress-free as possible. They consider each patient to be a part of their dental family and their friendly staff will help make the patient feel relaxed at every step of the dental process.

Dr. Cam Janse has more than 30 years of experience in providing dental care. Dr. Janse graduated from the University of Texas in Austin and obtained his Doctor of Dental Surgery (DDS) degree from the University of Texas Dental School in San Antonio. He had lived and practiced dentistry for several years in San Antonio until he relocated to Austin.
