Austin's Maid Service Offers House Cleaning Services

April 11, 2023

April 11, 2023 -
Austin, TX based homeowners in search of a reliable, affordable house cleaning service may be pleased to hear about Austin's Maid Service and their home cleaning services. The company is locally owned-and-operated, performs background checks on all its cleaners, is fully insured and is highly rated and trusted (as can be seen from its near perfect rating online).

An Austin?s Maid Service clean includes all rooms. The company?s cleaners will get rid of cobwebs and dust in every nook and cranny of the client?s house. This includes locations like ceilings, door frames, vents, blinds and anywhere else imaginable. Every room is cleaned from top to bottom, and the cleaners undertake a thorough check of each client?s house before they leave. Cleanings can be performed bi-weekly, once every three weeks, one-time and even just on special occasions. Austin?s Maid Service is flexible, and they are happy to clean clients? homes as and when they are needed.

The company offers its clients a 100% clean guarantee, promising to leave their clients? homes absolutely spotless and offers to re-clean houses that are not perfectly clean at no additional charge. ?Over the last six years, I've tried several house cleaning services, and while the cleaning itself was usually comparable, Austin's Maid Service stands out from the rest due to the level of professionalism and the great value,? says Mindy Cooper in a review of the company. ?Their rates are competitive in the market, and they've always shown up on time or early for my once-a-month cleaning. They've been really easy to work with when I've needed to add extra days or move appointments around.?

The review adds, ?One little thing they do that I love is that they send me a recurring calendar invite, so the schedule is clear on both sides and a reminder comes out the week of the service. Simple things like this mean a lot to me. I've struggled in the past communicating with cleaners who forgot, or were late, etc. With Austin's Maid Service, I feel reassured that my cleaners will arrive on time and will do a fabulous job. Thank you, Ginger and team, y'all are the best!?

There are a number of advantages associated with working with an established company versus an individual. First ? and perhaps most important ? is the fact that a professional cleaning company will always have a backup for the client, should the regular cleaner be unable to perform their duties. Professional cleaning companies are also able to assist if the client is dissatisfied with the cleanliness of their house. Similarly, individuals are rarely insured, unlike Austin?s Maid Service, which is fully insured and bonded. Lastly, background checks and interviews are all performed by the cleaning company, meaning that the client does not have to worry about the trustworthiness or professionalism of the cleaner and can simply rest assured that Austin?s Maid Service?s cleaners are trustworthy individuals who know what they are doing.

An excerpt from another review of the cleaning company from Sandra McCauley states, ?The person who provided our apartment move-out cleaning arrived just a little after the scheduled time, but I always give people a 15-minute window due to living in a gated apartment complex, so no issue with that as far as I'm concerned. Ms. Castillo took approximately two hours, the expected amount of time for our size apartment. She was very pleasant.?

Other customers report that Austin's Maid Service?s work more often than not produces better results than those of competitors. This, the company asserts, is their secret: a service so good that it stands well above the rest. Customers always want the best value for their hard-earned money, and few respect this as much as Austin's Maid Service.

For more information, customers may read about Austin's Maid Service online. Alternatively, they are welcome to contact the company directly via phone or email. Austin?s Maid Service can also be found on social media. Tips, updates and more can be found on these platforms.
