Mighty Dog Roofing of West Pittsburgh assures clients their roofing service is much different from that of other providers, especially with their use of advanced technology to provide the best possible service. One important feature of their service is their Drone Superscan inspection service. They will conduct a drone-assisted inspection focusing on 25 elements of the roof and other external elements of the home. These include the: downspouts inspection; aircon unit exterior inspection; inspection of valleys; inspection of step counter flashing; inspection of skylights; inspection of storm damage caused by the wind; inspection of step and counter flashing; eaves and rakes inspection; ventilation inspection; soffits and fascia inspection; roof edging inspection; drip edge inspection; inspection of roof sheathing or decking; inspection of gutter aprons; nail head inspection; roof ventilation and exhaust system inspection; plumbing stack inspection; hip and ridge inspection; gutters inspection; window inspection; chimney inspection; inspection of furnace caps and pipes; attic inspection; foundation drainage inspection; inspection of siding; and inspection of storm damage caused by hail.

They also provide a Customer Vault, which is a personal storage for each and every client. In this vault are stored the home's exterior records, photographs, inspection reports, products used, various kinds of reports, warranties, referrals, maintenance records, and various communications. With this vault, it is easy and convenient for Mighty Dog Roofing and the client to get any information they need.

They also provide a Watchdog Maintenance service, which has the purpose of making sure that any minor issue with the roof or other external part of the home is detected as early as possible to prevent it from developing into a more serious problem in the future that will be more costly to repair. They will perform the inspections of the roof and other exterior components of the home annually. These yearly reports will also be kept in the Customer Vault for that particular client. These yearly reports are compared with each other as a way to predict how long the roof can be expected to last. This ensures the homeowner is prepared for the key expense of a roof replacement.
