

LinkFusions Launches New Product Line Featuring NFC and QR Code Business Cards

April 06, 2023

April 06, 2023 - PRESSADVANTAGE -

LinkFusions, a leading multi-channel marketing company, has announced the launch of its latest product line, which includes digital business cards featuring Near Field Communication (NFC) and Quick Response (QR) code technologies.

The new product line, which is designed to provide a more convenient and effective way for professionals to exchange contact information, allows users to share their contact information in a more streamlined and efficient manner.

The LinkFusions NFC digital business card technology allows users to simply tap their smartphone against the card to instantly retrieve the contact information, while QR code business cards can be scanned using a smartphone camera.

"LinkFusions is committed to providing our clients with the latest and most effective marketing tools," said Ben Fatola, CEO of LinkFusions. "Our new NFC and QR code business cards offer a more efficient way for professionals to exchange contact information at conferences, business matchmakers, and other events."

The new product line has already received positive feedback from early adopters. Professionals who have used the new business cards have found them to be easy to use and highly effective in capturing leads and establishing new business connections.

"As a frequent conference attendee, I've found that the NFC digital business cards are a game-changer," said Anna Drake, a small business owner based in Las Vegas, Nevada. "They make it so easy to exchange contact information with new contacts, and I love that I can quickly and easily save their information to my phone."

LinkFusions' new product line is now available for purchase on the company's website.
