Dentistry At Central Medical Now Offers \$149 Tooth Whitening

December 03, 2015

December 03, 2015 - PRESSADVANTAGE -

Dentistry at Central Medical, occupying an office space in Central Medical multi-use building, has announced that it now offers \$149 tooth whitening.

Dentistry at Central Medical aims to provide professional tooth whitening at the lowest rates nationwide, and because they do all lab procedures in their office, they can provide top quality tooth whitening for \$149. Whitening services are regularly over \$400 at other dentistry providers.

"Tooth colored restorations have been available at our office for all teeth for years. We constantly update our techniques and materials. We pride ourselves in the beautiful cosmetic and esthetic dental procedures that we perform," says Dr. William H Johnson II, DDS.

Doctor Johnson has practiced Dentistry for 33 years. He has spent two years in the U.S. Coast Guard in Boston, one year in a large suburban private practice, nearly four years at the Indian Health Board of Minneapolis, and 26 years of private practice at Central Medical.

Dentistry at Central Medical also offers high precision, crown and bridge treatment. By partnering with the top dental labs in the city, Dentistry at Central Medical provides unequaled quality for crowns and bridges. Other services offered include veneers, state-of-the-art endodontics, dentures/partials, cosmetic procedures, periodontal disease, crowns/bridges, bad breath concerns, nitrous oxide, and more.

Dentistry at Central Medical is located in a medical specialty building in the St. Paul Midway area. The Central Medical building has a periodontist (gum specialist), and a root canal specialist. The wide variety of Medical specialties includes the best MRI facility in the city.

"Your initial oral examination includes a visual examination, charting, periodontal probing, diagnosis and treatment recommendations. We will also take x-rays, which includes the panoramic x-ray for proper diagnosis of the anterior (front) and posterior (back) teeth as well as the bite-wing x-ray series for proper diagnosis of proximal decay of posterior teeth," says Stephanie Johnson of Dentistry at Central Medical.

Dentistry at Central Medical's office is equipped with 3 modern operatories. Their lab has the latest in high-tech sterilization equipment. Only purified water (carbon filtered, ozonated, and exposed to intense ultraviolet light,) is used at the point of delivery of our dental drills and water sprays. They also have nitrous oxide (laughing gas) delivery systems in each of our operatories. Patients may use this form of conscious sedation for any type of appointment at the office.

For those patients that prefer or require special teeth cleaning equipment, Dentistry at Central Medical have the newest model of a "cavitron." This provides ultrasonic cleaning and has an enclosed "prophyjet" device. This allows a cleaning without the "gritty" paste.

Modern nickel-titanium rotary root canal instrumentation is available. Their "RootZX" computer simplifies and decreases the time spent doing root canal procedures. Bleaching (tooth whitening) trays are fabricated quickly and efficiently on site with our ultravac and ultra lume.

Air quality is maintained at an optimum level at Dentistry at Central Medical with electronic air purifiers. There are virtually no dental smells nor airborne allergens in their office.

Their office files insurance claims electronically for most dental insurance companies. Call Dentistry at Central Medical to find out more details about insurance details and their financial policy.

Owning and managing 22 suburban Minneapolis office and warehouse buildings, including Central Midway office building, JGM Properties works with over 300 tenants, including Dentistry at Central Medical. Founded in 1980, JGM Properties provides competitively priced office, warehouse, and retail space for lease in Minnesota.
