

Dr. Mark Hickman Offers Affordable Vasectomy Reversal Cost in Tourist Town New Braunfels

April 21, 2023

New Braunfels, TX - April 21, 2023 - PRESSADVANTAGE -

Dr. Mark Hickman, MD, FACS, a microsurgery expert in New Braunfels, TX, wants to highlight the all-inclusive packages for affordable vasectomy reversal being offered to people living in New Braunfels and even those from other parts of Texas and from other nearby states like Arkansas, Oklahoma, and Louisiana. Patients from all over country can hit two birds with one stone by coming to the New Braunfels clinic. In addition to getting the opportunity to beget children again, patients can enjoy the various sights and activities in this tourist town.

Dr. Hickman says, "You can also take advantage of the exclusive travel deals I have arranged with some of the New Braunfels hotels. Out of town patients can get a 50 percent reduction in the cost of their hotel accommodations. Please don't hesitate to contact us if you need more information about this."

It is important to note that New Braunfels is a popular tourist town as two of the most beautiful rivers run through this town. These are the Guadalupe River and the Comal River, which happens to be the shortest

river in the world. Furthermore, Schlitterbahn, which is conveniently located in the center of New Braunfels and is the biggest water park in the US, can provide a whole day of entertainment for people of all ages.

In addition, the village of Gruene is located very close to the vasectomy reversal clinic. Gruene is a quaint place filled with various kinds of restaurants and more than 20 shops that visitors can browse for their pleasure. This village also provides good music most evenings where there is a fun, country dance ambiance.

Only 10 miles away from New Braunfels is the Natural Bridge Caverns, which is a living cavern that offers various interesting sights. San Antonio can easily be reached with the I-35 and there, visitors can visit the Alamo and the River Walk. Tourists can also enjoy the Fiesta Texas - Six Flags and the Sea World of Texas in San Antonio.

The procedure for reversing a vasectomy to be used by Dr. Hickman will involve the microsurgical repair of the vas deferens, which is that tube that brings the mature sperm out of the testes and allows the sperm to reach the urethra for ejaculation. In the vasectomy procedure, the vas is cut, which prevents the sperm from becoming available for conception. The vasectomy reversal procedure requires finding the two ends of the vas, freeing them from the surrounding scar tissue, and joining them together using a watertight closure with the use of fine nylon suture and a powerful operating microscope. To increase the chances of success, Dr. Hickman will take a fluid sample from the testicular end of the vas and examine this under the microscope. If the fluid does not contain any sperm, Dr. Hickman will need to do a vasoepididymostomy in addition to the vasovasostomy but there will be no additional charge.

Dr. Hickman is an expert in laparoscopic techniques and he has also invented a number of useful surgical instruments for the procedure. He has also been awarded a US patent and has been recognized due to his contribution in various minimally invasive patents.

Dr. Mark Hickman finished his residency training in general surgery from the University of Texas Health Science Center at San Antonio and it was during this particular period of time, which lasted for five years, when he came to know about the microsurgery techniques employed by cosmetic and reconstructive surgeons. He immediately understood the importance of the minimally invasive procedure in improving the experience and the outcomes for his patients. He therefore decided to specialize in the use of microsurgery for his practice that focuses on vasectomy reversal for men who want to get back their ability to father a child.

Those who would like to know more about vasectomy reversal surgery being offered at affordable all-inclusive prices can check out the Microsurgical Vasectomy Reversals by Dr. Mark Hickman website or

contact them on the phone or via email. They are open from 8:30 am to 5:00 pm, from Monday to Friday.
