Peppy Heating and Cooling Offers Guide on How to Get Inflation Reduction Act HVAC Tax Credits in Nampa Idaho

April 25, 2023

Boise, Idaho - April 25, 2023 -
Peppy Heating and Cooling is offering a guide on how homeowners in Nampa, ID, can qualify for Inflation Reduction Act HVAC tax credits. These are new tax credits and rebates that have been made available by the Inflation Reduction Act (IRA) that became effective on January 1, 2023. These tax credits are expected to put in billions of dollars into the HVAC marketplace, which will make a variety of high-efficiency technologies less costly for residents of Nampa.

The purpose of the IRA is to renew the Energy-Efficient Home Improvement Tax Credit and also to increase the credit limit for the installation of high-efficiency HVAC equipment, like furnaces, heat pumps, hot water boilers, central air conditioning systems, and the like. The tax credits are available up to 2032 and these are intended to encourage homeowners to reduce their carbon footprint through the use of environmentally friendly and high efficiency heating and cooling products. These include high efficiency furnaces; high efficiency air conditioners; high energy efficient windows and water heaters, and high efficiency heat pumps.

There are various HVAC products covered by the IRA HVAC tax credits. These are the heat pumps, high efficiency air conditioners, high efficiency furnaces, high energy efficient windows, and high efficiency water heaters.

Heat pumps have been increasing in popularity in Nampa, Idaho because of the benefit of having just one unit to be used for heating or cooling a home. The heat pump can also decrease energy consumption, energy costs, and greenhouse gas emissions. Brett Shannon, President of Peppy Heating and Cooling, says "The heat pump rebates can be used by homeowners to upgrade to a high efficiency heat pump and this will enhance their home comfort while also decreasing their energy costs. The rebates make it easy for homeowners to upgrade their heating and cooling system."

Peppy Heating and Cooling is an American Standard Customer Care dealer and they can provide American Standard Heat Pumps that provide comfort and long-lasting reliability. Also available are the ductless mini split or the ductless heat pump, which is the modern way of heating or cooling a home or business. The HVAC company is also a Mitsubishi Elite Diamond Contractor, which allows them to offer products from the best manufacturer of ductless heat pumps. Mitsubishi Electric is a premier manufacturer of ductless systems, which have become popular because of their dependability and reliability. And as a Mitsubishi Elite Diamond Contractor, this means the technicians from Peppy Heating and Cooling have undergone top level training and are capable of providing a high level of support and service to their customers.

Brett Shannon explains, ?The modern version of the heat pump is highly efficient. That is the result of today?s cutting edge heat pump technology, which has come a long way from 20 years ago when people often complained about their heat pumps. What makes the heat pump a favorite is that only one unit is needed to provide both heating and cooling, which means substantial savings for the consumer.?

The ductless heat pump is applicable for various situations. First, it can be used to get rid of hot and cold spots in the home or office. Second, it is the better choice for homes heated with other means of heating. Third, the ductless system can be used instead by those who need to add an air conditioner. Fourth, it is applicable for homes without duct work. Fifth, it may be used to replace a furnace that is more than 12 years old and requires replacement. Lastly, the ductless system is recommended for any home with a family member with asthma or allergies.

SHANCO Heating and Air, which has become Peppy Heating and Cooling, was founded in 2016 by husband-and-wife Brett and Tenley Shannon. Their initial goal was to establish a commercial heating and air conditioning company. However, after six years in the industry, they observed that they have been receiving more and more requests for residential HVAC services and they also felt that working with homeowners was fun.

When requiring more details about the HVAC tax credits, those who are interested can check out the IRS website.
