Intelli Heat? Dual Fuel System Now Available For Boise, Nampa Customers

April 24, 2023

Boise, Idaho - April 24, 2023 -
Idaho based Peppy Heating and Cooling is pleased to offer the intelli-HEAT? Dual Fuel System to Boise and Nampa homeowners. The system is manufactured by Mitsubishi Electric Trane HVAC US LLC (METUS), a leading supplier of Ductless and Ducted Mini-split and Variable Refrigerant Flow (VRF) heat-pump and air-conditioning systems.

The intelli-HEAT? Dual Fuel System offers many benefits, with one of the most prominent being the fact that it is compatible with all thermostat-controlled (ANSI-Z21.47/CSA2.3 certified) furnaces. As a result, homeowners who utilize gas furnaces will now be able to make their homes more comfortable with this energy-efficient, all-electric heat pump.

The system?s efficiency also makes it far more sustainable for regular use, and the furnace need not be replaced in its entirety. Instead, it is recommended that the furnace remain onsite to function as a heating source in extremely cold conditions. In fact, the control box of the intelli-HEAT? Dual Fuel System features an intelligent switchover function that enables it to identify when the furnace is a more practical choice. The result of this is a smart system that lowers both gas usage and greenhouse gas emissions ? without compromising homeowner comfort.

?Your intelli-HEAT? Dual Fuel System is a great choice,? states Peppy Heating and Cooling President Brett Shannon, ?if your goals are to reduce your utility costs while simultaneously limiting the amount of pollution you introduce both in and around your home. It is energy-efficient, and it is clean, and this essentially means you no longer have to choose between cost savings and your health. Of course, certain households may benefit more from this system than others. We invite you to come speak to us if you have any further questions.?

Homeowners will also find that their new intelli-HEAT? Dual Fuel System is capable of delivering a

consistently comfortable experience throughout the year, and the company attributes this to its INVERTER-driven compressor technology. Notably, this means homes that presently do not have a cooling solution can make use of it as well. Peppy Heating and Cooling says the system can be used in temperatures as low as -13º F

The system is available in different capacities, including 18, 24, 30, 36 and 42 KBTU/H, and it can be deployed in both single- and multi-zone applications. While it is recommended that homeowners use the system with Mitsubishi Electric?s control options, Peppy Heating and Cooling is pleased to confirm that it is compatible with third-party thermostats.

Peppy Heating and Cooling strives to match its offerings to what its community needs, and this has helped it build an equally positive reputation among residential and commercial customers alike. Many share that the team employs a strong work ethic and is committed to leaving no stone unturned in search of a suitable solution. This means, regardless of how difficult or challenging a job may be, no customer will ever be left without assistance ? and this is made possible due to the company?s insistence on hiring the best in the industry. Further, each technician receives ongoing training to ensure they stay up to date with the latest advancements in heating and cooling technologies.

The company is also reported to show clear respect for its customers? privacy and other personal concerns (including budget), a trait that has made them a household name for virtually all who deal with the Peppy team. One review says, ?Wonderful experience, very courteous and knowledgeable. Found debris in the exhaust removal system, which meant a port was clogged up, thus making one of the pressure switches to close all the way and trip the system. The technician explained in clear detail. Very pleased and will use this company again. Thank you.?

Boise and Nampa homeowners are welcome to contact the company by phone or email to inquire further about the new intelli-HEAT? Dual Fuel System. Peppy Heating and Cooling is capable of meeting virtually every HVAC challenge a property may present with, and this makes installations a straightforward process for every customer.

More information can be found on the company?s official website and on Peppy's YouTube channel.
