

Electronic Merchant Systems Offers Payment Processing Solutions for Baby Clothes Stores

April 25, 2023

Cleveland, Ohio - April 25, 2023 - PRESSADVANTAGE -

Electronic Merchant Systems (EMS), a company based in Cleveland, OH, is pleased to announce they are offering baby clothes store payment processing solutions. EMS can help the baby clothing store by providing the most appropriate point of sale (POS) systems, fully customizable gift cards, and mobile payment processing solutions. With their more than 1,000 positive reviews on Google, it is clear that they have helped many businesses, including a number of retail stores, grow.

A spokesperson for EMS says, "As the owner of a baby clothing store, you have a lot on your plate. Between stocking the shelves, accepting deliveries, and providing excellent customer service, the to-do list is never-ending. There is, however, one factor that must not be overlooked: convenient and speedy payment processing. At EMS, we work closely with small businesses like your store to ensure long-term payment solutions that promote success."

For baby clothes stores, they recommend the MaxxPay® Mini, which has been designed to minimize the amount of counter space that it occupies while still providing all of the important POS features. The advantages it can provide include: fast payments; an easy-to-use interface; a cloud-based back office; and high functionality. The quick payment processing will naturally be appreciated by customers who won't have to wait a long time to pay for their order so that they can proceed to their next destination as quickly as possible. This POS system also allows the baby clothes store to accept all major credit cards as payment, including contactless, swipe, and chip alternatives.

The MaxxPay Mini has a: 5-inch touch screen with a white LED backlight; a 0.3 megapixel fixed front camera with 5-megapixel autozoom; a rear camera for reading 1D and 2D bar codes; a card reader that can accept chip cards, swipe cards, and mobile wallets; and a long-lasting lithium-ion battery.

For larger baby clothing stores, they might prefer the MaxxPay® Pro, which offers similar features as the

MaxxPay Mini except that it is a bit bigger. It features an 8-inch touch screen, 4.3-inch color touch screen display; 3-inch high-speed printer; a card reader for accepting chip cards, swipe cards, and mobile wallets; a standalone four-bill, four-coin cash drawer; and an integrated camera for 1D or 2D bar code processing.

EMS is committed to handling all of the store's requirements for merchant services in the best way possible. These include: gift & loyalty programs; streamlining business operations; providing the best credit card rates; improving cash flow; and providing the top payment processing tools and opportunities.

Gift and loyalty programs are a vital component of the marketing strategies of baby clothing stores because repeat customers can help grow their business. Gift cards can encourage customer loyalty, increasing the store's overall revenue. Because gift cards benefit everyone, satisfied customers may recommend the store to family and friends. This allows the store to gain new customers, especially if their items are high quality, which means the customers will continue recommending them to other friends and family. EMS ensures that the gift cards are attractive through their in-house design team.

Launched in 1988, Electronic Merchant Systems has become well-known as a leading payment processor and merchant services company with over 30 years of experience in the payment processing industry. They have already helped many small businesses increase their profits by allowing them to accept card payments, including electronic bank transfers, all major debit cards, stored-value cards, electronic check services, and all credit cards. They have assisted tens of thousands of Internet, start-up, and retail businesses in various cities around the United States. Around 95 percent of EMS customers have benefited from the enormous savings from a rate review. EMS has 11 regional sales offices in key cities in the country and a presence in 100+ cities.

Those who want more details about their various payment processing systems, such as their POS solutions for barber shops, can check out the EMS website or contact them via phone or email.
