Drystar Restoration & Construction LLC Is Offering Highly Available Water Damage Repairs in Phoenix

May 10, 2023

Mesa, Arizona - May 10, 2023 -
Drystar Restoration & Construction LLC is offering a range of water damage restoration services in Phoenix, AZ, and nearby areas.

Loved for its responsive and reliable 24-hour emergency services, Drystar offers homeowners and business owners in the Phoenix Metro area all the help they need to restore their property following a water damage disaster. Armed with the latest equipment and with a team experienced in all kinds of restoration techniques, Drystar offers customers end-to-end water damage repairs in Phoenix, eliminating the need to rely on multiple contractors.

?We realize just how crucial the first few hours are,? says the spokesperson for Drystar Restoration & Construction LLC. ?Whether the water damage is caused by a natural event such as a storm or a failure of the building?s plumbing systems, if you don?t act fast, the water can seep into the property?s foundational elements and weaken the structure. This is not only bad news for its long-term health but it can also end up endangering the safety of its occupants.?

The full-service water damage restoration company in Phoenix, AZ, is on call each day, 24/7, to help property owners as soon as the problem arises. The company?s trained and experienced professionals first begin by addressing the root cause of the leak. Drystar Restoration & Construction can help remedy all sources of water damage including broken or leaky pipes, bathtub overflow, sink overflow, toilet overflow and leaks, air conditioner leaks, refrigerator, washing machine, water heater, and dishwasher overflow, hardwood floor water damage, crawlspace drying, sump pump failure, and more.

Next, once the source of the leak has been removed, the company creates a plan to extract all the water that has settled to prevent it from doing any more damage. Drystar uses specific moisture-detecting tools to see where the water has migrated. The company uses industrial-grade drying equipment to ensure the damaged area is water-free and to prevent the building materials from warping, swelling, delaminating, and buckling.

To ensure that the dried area is habitable again, Drystar will then undertake odor removal and deodorization with a thorough cleaning of all the walls, flooring, furniture, upholstery, clothing, and other valuable items. Finally, the parts of the home that have been irrevocably damaged are restored by performing any minor repairs such as replacing drywall or installing new carpet, or major reconstruction on the property?s core structural components.

Phoenix homeowners and commercial property owners have praised Drystar Restoration & Construction time and time again for its highly available emergency services and exceptional workmanship. The company?s range of restoration services including water damage restoration, fire damage restoration, mold remediation, asbestos abatement, storm repair, sewage cleanup, cleaning, flooring, and remodeling have earned it an impressive overall rating of 4.5 out of 5.0 on its Google Business Profile from over 100 reviews.

One recent customer review says, ?Robert Simonson is the absolute best to work with! Super attentive to detail and had all the information we needed to get our house taken care of. Robert was there to help every step of the way. I?m so glad our first call was to Drystar and Robert to get this flood taken care of.?

Another satisfied Phoenix homeowner writes, ?These guys are awesome and professional. The mitigation guys were fast and efficient in their work. Adrian was very informative and transparent about how the entire process works, from start to finish, and I felt I was in good hands with people who had MY best interests in mind. Any question or inquiry I had, whether after-hours or on the weekend, Adrian was always available. It seemed he was one step ahead of the adjuster. My project manager, Martin, was always a wealth of knowledge. They have a great team over there and they orchestrated the handling of my claim very efficiently.?
