SoftBreath Women's Running Socks Now Available In Royal Blue

December 21, 2015

December 21, 2015 -
New Orleans, LA business SoftBreath has announced that they have now released their popular running socks for women in royal blue color. The socks were previously available in black only but customers had put in requests for them to be available in a number of other colors as well. The socks have been made available at http://www.amazon.com/dp/B018RGXPW8.

Parick Shawn from SoftBreath stated: "We love the fact that our customers are so happy with our product. We understand that, without them, our business wouldn't exist. This means that we listen to what our customers have to say, and when so many people ask for the socks to be available in a different color, we release them in that color. Royal blue was the most requested, that is why we have made them available, but we may also release it in other different colors in the near future."

The socks contain 86% cotton 10% polyester 3% spandex 1% elastic and are made to be soft and comfortable. They have been designed specifically for runners, with the fabric stopping them from developing sweaty feet. In fact, according to SoftBreath, someone could run a full marathon in the rain when wearing these socks and still finish with dry feet.

Additionally, the socks can be used for everyday wear. Because they are so comfortable, people have been looking for ways to incorporate them into their daily wardrobe. This was expressed very well by one of SoftBreath's many customers. "This is one of the best pairs of socks I own, and trust me, I own a lot of athletic socks, including expensive cashmere and crew socks," says one happy customer. "They are extremely soft and high-quality, and I often find myself wanting to wear them for various occasions that don't include running just because they are so comfortable."

SoftBreath also encourages everybody to give them a 'Like' on Facebook through https://www.facebook.com/softbreathbrand. This will give them an opportunity to remain up to date with new product developments, special offers and discounts. Additionally, those who Like the page can get involved in the conversation, making requests for further product customizations they may enjoy, including different

colors. Should their suggestions be accepted, they will also be among the first to know.
