

## **Hot Selling New 5 Star Bike Phone Mount Release Announced**

*December 07, 2015*

December 07, 2015 - PRESSADVANTAGE -

All Out Inspired has recently announced the launch of their iPhone bike mount. This phone mount has been designed to be easy to install and fit most smartphones. Full details about the product can be accessed at <http://www.amazon.com/dp/B016R1RBYS>. Since its recent launch, customers have been raving about the product.

"We believe our smartphone bike holder to be completely unique and of the highest possible quality," says K.P. Malone from Inspired Grill Instruments. "This is why we also offer it with a free five year guarantee. The product is built to last, even for very frequent bikers, and we stand fully behind its quality. We are happy to see people are already leaving positive reviews about it."

The phone mount has been designed to offer full visibility of the device's screen. This means people can use it as a SatNav device as well, for instance. It also swivels in any direction effortlessly, as it comes with full 360 degree rotation capability. This means that people can still see their device even if they are off their bike as well.

The product has already received quite a significant number of positive reviews and is set to become a bestselling product on the Amazon marketplace. "Just used this fantastic invention this past weekend on a 30 mile bike ride," says one happy customer. "I am an avid biker and usually carry my phone in a very small case attached to my bike, which usually means its out of sight and out of mind, which means I miss every call and text I get while I'm riding. But with this mount I was able to hear and see when people were calling and texting me. It also stayed in the holder the entire time, even when riding over a rocky terrain. Needless to say, I am impressed. Only wish I had this come into my life sooner."

The device comes with an adjustable clamp and a strong four point silicone strap. This keeps the device in place at all times. Installation is quick and easy and does not require any special tools. The durable design means the holder is built to last.
