Buffalo Ophthalmology Moving Southtowns Practice to New Site in Orchard Park

April 14, 2023

Orchard Park, New York - April 14, 2023 -
Orchard Park, NY, ? Buffalo Ophthalmology has announced that they are moving their Southtowns practice to a brand-new location in Orchard Park on Sterling Drive. The new practice is roughly five minutes away from the original location with much improved highway access, making it just as convenient for patients in the area and for those traveling from other parts of Western New York, the southern tier, Canada, and Pennsylvania. It features a fully updated interior and serves as one of Buffalo?s more modern and technologically advanced medical practices. By moving locations, the proudly Buffalo owned and operated practice can continue to provide patients with high-quality medical eye care services in an environment that?s more conducive to their wellbeing.

"We are excited to move into our new facility and to continue to provide our patients with the best possible care,? said Deepan Selvadurai, M.D., managing partner of the practice as well as practicing anterior segment, glaucoma, and cataract surgeon. ?The new building will allow us to offer a wider range of services and to provide our patients with the most advanced eye care available. "

The new facility is completely refurbished and is entirely dedicated to Buffalo Ophthalmology. There is also a surgical center attached that in the future will allow greater options and flexibility for patients requiring surgical services. As the practice has expanded beyond a single suite, one of the goals of the new location is to be able to serve a larger number of patients at the same time. The larger space also allows for more diagnostic technology, making it easier for the practice?s ophthalmologist and optometrists to provide the best experience for patients undergoing potentially lifechanging care. Buffalo Ophthalmology has also partnered with its new optical shop, Buffalo Optique, which is located within the new Sterling Drive location, making shopping for eyewear easily accessible for Southtowns patients.

?This new building will allow us to provide our patients with a comfortable and convenient experience, and it will also allow us to offer them the latest in eye care technology while providing the latest fashion in eyewear

for patients of all ages,? said Dr. Selvadurai.

Dr. Selvadurai?s early adoption and utilization of newer technologies, surgical methods, and treatment options for a variety of diseases, including complex cases of cataracts and glaucoma, is a recurring feature of Buffalo Ophthalmology. All staff and locations are noted for their attention to detail and quality service, something Dr. Selvadurai hopes will only continue to advance with the new practice, especially as long-held ties to the Buffalo community have enabled the doctors to build close relationships with their patients.

?We are committed to providing our patients with the best possible care, and our new state-of-the-art facility will allow us to do just that,? said Dr. Ausra Selvadurai, M.D., retinal disease specialist.

The excitement is palpable as the practice settles in. The new location is located at 301 Sterling Drive, Orchard Park, New York 14127. All Buffalo Ophthalmology practices are open and taking appointments for new and existing patients.

About Buffalo Ophthalmology

Locally owned and operated since 1990, Buffalo Ophthalmology is a medical eye care practice comprised of specialist ophthalmologists and now optometrists. Noted for their focus on quality patient care, Buffalo Ophthalmology?s physicians are known as research pioneers who are interested in further advancing different eye care treatments. With an emphasis on patient care, the two locations are known to draw patients from other states due to the high degree of specialty care that?s available in their compassionate environment.
