

Roofing Contractor Serving Magnolia Offers Free Inspection

April 28, 2023

April 28, 2023 -

Mighty Dog Roofing of East Austin, serving Magnolia, TX, wants to inform everyone that they are offering a free roof inspection. This is not the typical inspection because this will be done using drone technology, which ensures the inspection report will be unbiased as it provides credible and verifiable inspection information from the smart intelligence analytics. The data generated by the drone is transmitted to the cloud where it is processed and converted into 3D models and AI is used to generate a damage review and report in just a few minutes. Those who want to know more about this roofing contractor can visit company website.

The Drone Superscan inspection service they provide will involve a drone-assisted inspection that will examine 25 elements of the roof and other external components of the home. These include the: aircon unit exterior inspection; inspection of valleys; inspection of storm damage caused by hail; inspection of skylights; inspection of storm damage caused by the wind; downspouts inspection; eaves and rakes inspection; ventilation inspection; inspection of step counter flashing; roof edging inspection; drip edge inspection; inspection of step and counter flashing; inspection of gutter aprons; nail head inspection; soffits and fascia inspection; plumbing stack inspection; hip and ridge inspection; inspection of roof sheathing or decking; window inspection; chimney inspection; roof ventilation and exhaust system inspection; attic inspection;

foundation drainage inspection; gutters inspection; inspection of furnace caps and pipes; and inspection of siding. The initial roof inspection report can be used to set the baseline health of a customer's roof.

Mighty Dog Roofing of East Austin also provides the Customer Vault for the convenience of the client. They will be keeping the roofing service records and measurements, including the history of any roof repairs or replacement that have been performed for that particular roof in the Customer Vault. Included are: annually updated drone information; warranty information; photos and videos; manufacturer information; insurance information repair records; and reports for the customer's realtor/insurance agent; annual reminders for the inspection of the customer's roof; tracking of all repairs and replacements with dates, products, and services used; and all insurance details for easy and convenient claims handling. They will also work directly with the customer's realtor when the home is being sold to help get the best possible selling price. Those who want to get more information about the services can visit web site.

Mighty Dog Roofing of East Austin also offers the Watchdog Maintenance service. This service is designed to detect any issues with the roof as early as possible so that it may not become worse later on. This is to avoid more serious roof problems in the future that will be more costly to fix. They will do the inspections annually and submit yearly maintenance reports that will be stored in the Customer Vault for that specific customer. They will also compare the various yearly reports to provide an idea of how long the roof can be expected to last. This will enable the homeowner to be ready for the huge cost of replacing the roof.

They also provide the Curb Appeal Visualizer, which is an app that can run on any mobile device, enabling the homeowner to visualize how the house would look like when a specific paint color, roofing material, etc., are used. The client can try different combinations until they are satisfied with the resulting appearance of the home.

Mighty Dog Roofing of East Austin is locally owned and operated by Bob and Monica Welch who have resided in The Woodlands for more than 18 years and they have been active in the local community in various activities, including their local church. Monica is co-owner of Restore Pilates of The Woodlands, where she provides private training for enhancing overall fitness and well-being. Bob has a strong background in engineering, business, and product line management.
