

New Dermatologist Clinic In Las Vegas Opens It Doors

December 08, 2015

December 08, 2015 - PRESSADVANTAGE -

Five Star Dermatologist is proud to have opened their new dermatology clinic in Henderson, NV. From their new offices, they will be able to address all the most common dermatological issues. While having only recently opened, they are already seeing a great deal of patients.

"There is a significant shortage of dermatologists in the state of Nevada," says a representative from Five Star Dermatologist. "This is unfortunate because the state sees higher than average number of skin conditions, which is mainly attributed to the weather. We are happy to be offering these high demand services, therefore, and to see many people already coming to us for treatment."

The new clinic offers treatment for all the most common dermatological conditions. These include acne, moles, poison ivy, rashes, warts, and more. These services are offered by fully qualified dermatologists who are committed to offering the best possible levels of care.

The clinic also wants to encourage patients to follow them on Twitter. This is an opportunity to find information on emerging dermatological conditions and news, as well as to find details about what to look out for in skin conditions. Their Twitter account is available through <https://twitter.com/fivestarderm>.

The prevalence of skin problems in Nevada is higher than the national average, believed to be due to the high levels of sunshine. There are higher incidents of skin cancer, for instance, and not enough people are seeking treatment for this. The reasons for this include a lack of awareness on what to look for, and also a lack of availability of trained dermatologists. This is why the opening of the new clinic has been welcomed by so many people.

"I had a strange mole on my arm for some time," says one satisfied patient. "While I had some worries about it, I put it to the back of mind because I didn't really have a good clinic to go to either. Thankfully, Five Star Dermatologist opened a clinic. They were able to confirm the mole was benign, but I was worried about it for a little while. Their service was truly beneficial for me."

The company also asks everyone to give them a 'Like' on Facebook through <https://www.facebook.com/5stardermatologist>.
