Roof Installation Provider in Manchester Offers Advice on What to Do When a Newly Installed Roof Has Wavy Shingles

April 28, 2023

April 28, 2023 -

Slavin Home Improvements, a roofing contractor based in Manchester, CT, has recently published a blog post that offers advice to homeowners on what to do if they notice a wavy pattern in the asphalt shingles in a newly installed roof. The situation may occur even after a certified and reliable roofing company has completed the roof installation. The roofing contractor may have done a great job, the materials used may be new, and they may have been installed over great sheathing and fresh material, but a homeowner may still occasionally notice a strange wavy pattern that is not supposed to be there.

Zak Slavin, owner and founder of Slavin Home Improvements, says, ?In some instances, wavy asphalt shingles are normal after installation. The materials haven't properly set in because of the local temperature. It should look flat within a few days. When it remains wavy and abnormal-looking after a week, you can call your roofer to examine its cause. Often, the roof material isn't to blame. Sheathing, trusses, nailing, and other factors also come into play.?

According to the Slavin Home Improvements blog post, the typical reason for the wavy shingles is too much

moisture under the shingles. In addition, there are a number of factors that contribute to the severity of the waviness. These include improper nailing where the shingles have been nailed too close together; the use of low qualify underlayment; a poorly installed decking such as an installation with insufficient spacing between panels or plywood that is too thin; and shifting plywood on the deck because of too much moisture under the shingles.

Meanwhile, for those who are wondering if they should get a roof replacement, they want to emphasize that if a damaged roof is not immediately fixed, the problem will surely become worse later on and the homeowner may end up spending much more. Furthermore, roof leaks, if they are not fixed as soon as possible, can result in chipped and peeling paint on the walls. These holes can also increase energy consumption and electric bills. In addition, sagging lines can result in an eventual roof collapse. While a roof replacement is a significant investment, it is something to seriously consider because of its serious impact if delayed.

In addition to the roof, it is also important to check on the condition of the gutters and downspouts. These direct rainwater to where it should go ? directly to the sewer lines and away from the garden and the yard where rainwater can soften the soil and cause the foundation to lose support and sink and settle. This can lead to cracks in the walls, broken pipes, and doors that are hard to close.

Since its beginning in 2011, Slavin Home Improvements has become a comprehensive roofing contractor that can provide all types of repair or installations of roofs, gutters, and sidings. They are completely licensed and insured to deliver roofing services in the state of Connecticut. Zak Slavin, owner and founder of Slavin Home Improvements, believes that it has been their integrity, honesty, and hard work that are the major reasons for their reputation as a dependable roofing service provider. They always strive to provide the best possible service because their guiding philosophy is to consider every home they go to like it was their own. The places they serve in addition to Manchester, include Ellington, Tolland, Glastonbury, Vernon, East Hartford, West Hartford, Avon, Farmington, South Windsor, Burlington, Stafford Springs, Simsbury, Windsor Locks, Enfield, Windsor, Colchester, Marlborough, Hebron, Columbia, Amston, Andover, New Britain, Bristol, Middletown, Southington, Berlin, and Newington.
