

Cestari Kitchen Announces Availability Of Red Version Of Ceramic Vegetable Peeler

March 27, 2015

LITTLETON, MA - March 27, 2015 -

In view of the success of the Pro Peeler that was introduced by Cestari Kitchen in July 2014, they have now introduced a red version of this ceramic vegetable peeler. This is in direct response to consumer color trends, and to give people a choice when it comes to their utensils.

"Our first Cestari Kitchen Pro Peeler is of fantastic quality and has a beautiful, sleek, black appearance" explains Susan MacDowell. "However, we quickly noticed that consumer color trends showed that people like red in their kitchen as well. Hence, we have released the product in red, which makes it a real show piece in the kitchen, naturally without compromising on quality in any way."

The Cestari Kitchen Pro Peeler has a blade that is made of ceramic and is razor sharp. The handle has been designed to be fully ergonomic as well. The device comes with a lifetime warranty, as Cestari Kitchen is fully behind the quality of their products.

One of the things that makes this kitchen device so special is that it is calibrated to reduce waste. It takes off such a thin piece of peel that no amount of vegetable will be lost. At the same time, it is able to deal with hard

skin vegetables like a butternut squash. As an added bonus, the blade of the peeler can be removed and customized. This means that it can be used by both right-handed and left-handed people.

Cestari Kitchen also has a special offer to match the launch of their new red peeler. When customers order through the www.amazon.com/Best-Vegetable-Peeler link, they will receive a free eBook on how to select the best fresh vegetables. This will ensure that people can enjoy healthy eating and can get the most out of their peeler. Indeed, the company is keen on helping people to eat healthily. This is at the heart of the design of their vegetable peeler. They understand that the majority of the nutrients in a vegetable are found just underneath the peel. If a poor quality peeler is used, most of these are removed and people only eat the flesh rather than the actual nutrients that a vegetable is supposed to give them.

"People think that eating vegetables is always nutritious," explains Dr. Steven Clark. "While it is certainly true that any vegetable is better than no vegetable, to be truly healthy, people need to eat the flesh that is found closest to the peel itself."

Cestari Kitchen is known for its innovative and high quality kitchen utensils. They have received a variety of positive reviews for each of these items. Cestari Kitchen is a truly innovative company that puts quality first when it comes to their devices. Additionally, they follow market and consumer trends. As a result, they now offer their peeler both in sleek black and beautiful red.
