

Method Aesthetics Academy Student Shares Her Transformative Learning Experience

April 20, 2023

Pensacola, Florida - April 20, 2023 - PRESSADVANTAGE -

Pensacola, FL ? Method Aesthetics Academy has recently shared a transformative testimonial and success story from graduate Lynda Linde, ARNP, CRNA, MS, owner of the MarAvisa Wellness & Aesthetics Boutique in St. Augustine, FL. Linde completed several courses at Method Aesthetics Academy, including the Level II Advanced Training, where she learned about lower face neurotoxin injections, cannula technique, and jawline, chin, and temple treatments. The success story comes as a win for Method Aesthetics Academy, who have been developing their reputation locally in Pensacola and within the aesthetics industry. They continue to work toward their vision of improving their field by creating the next generation of skilled practitioners.

?I had an absolutely incredible experience training with Marlee, Brittany, and Katie at Method Aesthetics Academy,? said Linde. ?I learned more than I thought was possible in a single weekend. Prior to starting, I only knew the basics of injecting. They not only teach you the skills necessary to perform different treatments, but they also help you build your confidence so that you feel comfortable doing them on your own.?

?I love having passionate students like Lynda tell us about how beneficial our training courses have been for them,? said Marlee Bruno, co-founder of Method Aesthetics Academy. ?It?s incredibly fulfilling to hear that our courses have been invaluable to students and that they feel empowered to make their own way in the industry. I?m especially proud of Lynda as she runs her own practice. We?re very supportive of fellow providers and are incredibly proud of Lynda?s growth, confidence, and skill.?

Typically, aesthetics practitioners already have medical backgrounds, but the training for aesthetics procedures ? from injectables to nonsurgical facelifts and lasers can vary based upon instructor. Method Aesthetics Academy seeks to help aspiring practitioners gain confidence and expertise in their techniques through hands-on training in intimately sized classes, utilizing models and various products. Additionally, Method Aesthetics Academy students are also trained to deal with complications, something many practitioners only experience while already working with in the field.

"I plan on taking their level three course next," said Linde. "Knowing how responsive and caring they are, I'm going to keep taking courses, whether they're level four, five, six, or seven! I've also been sending my own staff to train at Method Aesthetics Academy. The instructors are fabulous, and I want my team to be the best of the best, which is something they can definitely accomplish with Marlee, Katie, and Brittany's guidance."

Method Aesthetics Academy offers courses that range from beginner-level introductions to the aesthetics industry to trainings on more advanced and niche topics within the ever-expanding field. Method Aesthetics Academy is open and taking inquiries from potential students.

About Method Aesthetics Academy

Method Aesthetics Academy is a Pensacola-based training school for current and future practitioners within the aesthetics field. Open to those with medical degrees, courses range from introductory basics to cutting-edge techniques utilizing innovative technology. Run by Marlee Bruno, Brittany Perez, and Katie Reber, the experienced trio emphasizes the important nature of hands-on experience, individualized training and instruction, and ongoing mentorship within the field. Graduates of the courses keep in touch with each other via online mentorship groups, with the school also providing lessons on business acumen to help prepare the next generation of students for what the ever-growing aesthetics industry brings.
