

North Carolina Waterproofing Company Greenserve Is Now A NORMI Certified Whole House Mold Remediation Contractor

May 10, 2023

May 10, 2023 - PRESSADVANTAGE -

North Carolina-based home waterproofing solutions company Greenserve has announced that it is now certified by NORMI as a Whole House Mold Remediation contractor.

Greenserve is a full-service basement waterproofing, crawl space repair, and home performance company that has been serving Charlotte, Winston-Salem, Greensboro, and the Piedmont Triad in North Carolina since 2014. Now, with its certification from NORMI (National Organization of Remediators and Microbial Inspectors), residents in its service area can rest assured that, with Greenserve, they are getting top-notch mold remediation services in North Carolina.

NORMI CMRs (Certified Mold Remediators) are fully licensed and insured professionals who are trained to meet specific state requirements for licensure and have completed at least 24 hours of education in mold remediation techniques including assessment, mold, water, and respiratory protection (PPE). Securing the certification requires completing an onsite course that includes extensive hands-on training including sampling processes, PPE, building containment, establishing negative pressure, and fresh air makeup.

The spokesperson for Greenserve talks about the certification journey by saying, "Our skilled team was already adept at finding and mitigating issues such as mold, dry rot, humidity, allergens, mold spores, and more. Getting certified by NORMI was a way to legitimize our existing mold remediation skillset and give customers complete peace of mind. North Carolina homeowners can now count on Greenserve to follow all industry-standard protocols for mold remediation based on IICRC S500, IICRC S520, NYS Guidelines, EPA Standards, and NORMI Professional Practices. So, if you find mold growing in your property and need a quick, high-quality, and affordable solution, you can rely on Greenserve to solve it for good."

The team at Greenserve boasts a combined experience of over 25 years and can provide custom-designed basement waterproofing and crawl space encapsulation systems as well as effective building envelope solutions for new construction and retrofits of older homes and businesses. Greenserve also offers technical assistance with home performance issues concerning moisture, heat loss, and indoor air quality. The team prides itself on performing thorough home energy assessments using the latest diagnostic equipment and infrared scanning to find problems and recommend solutions.

The company's Healthy Basement Certificate and Healthy Crawl Space Certificate allow it to assure a high standard of quality along with a nationally backed guarantee. The BBB Accredited business is an EPA Lead-Safe Certified Contractor, Grate Products Certified Healthy Basements Contractor, has a Building Performance Analyst Certification, is a Duke Energy Smart Saver trade ally, and is a member of the NCBPA (North Carolina Building Performance Association) and the North Carolina Weatherization Assistance Program.

Homeowners in North Carolina have repeatedly praised Greenserve for its meticulous waterproofing services, the professionalism of its crew members, and helpful customer service. The company even has an impressive overall rating of 4.7 out of 5.0 from over 30 reviews on its Google Business Profile.

One homeowner says, "Got three estimates for attic insulation and crawlspace vapor barrier. Greenserve was in the middle but talked with Carlos and he helped me figure out a financially viable option. Liked his approach and attention to detail. When the work was done the team did a great job and I was well pleased with the whole experience from start to finish. Felt comfortable working with this company."

Another reviewer writes, "Carlos and team were professional and quick to install insulation in our attic (blown) and under our floor (bats). This has resulted in our home feeling much more comfortable and should reduce our heating/cooling bills in the future. Would recommend their services to friends and family. Great work team!"

Apart from mold remediation, Greenserve also provides home energy solutions such as full-service insulation, air sealing, duct sealing and cleaning, and lighting, basement waterproofing solutions such as draining systems, sump pump installation, and dehumidifiers, crawl space repair solutions such as vapor barriers, waterproofing, ventilation, encapsulation, and ATMOX, and solar solutions such as solar panels and solar attic fans.

Readers can contact Greenserve at (980) 432-0042 or info@greenserve.us for inquiries about its mold remediation services.
