

Dr. Mark Hickman from New Braunfels, Texas, Is Working Tirelessly to Reduce the Price of a Vasectomy Reversal

May 08, 2023

New Braunfels, TX - May 08, 2023 - PRESSADVANTAGE -

Vasectomy reversal surgeon Dr. Mark Hickman is on a mission to make vasectomies more reliable and affordable than they have ever been.

Dr. Hickman is a highly skilled microsurgeon with decades of knowledge and experience in his chosen field. He is regarded as an early pioneer of laparoscopic (minimally invasive) surgery, a specialization that he focused on after beginning his private practice in New Braunfels, Texas, in 1988. Today, he is credited with the invention of several microsurgical instruments, has been awarded a US patent, and is recognized as a contributor to several other important minimally invasive patents.

At his clinic in New Braunfels, Dr. Hickman has channeled his knowledge of microsurgery into improving the vasectomy reversal procedure and making it more affordable. As a man of strong Christian faith, Dr. Hickman uses his expertise in microsurgery to give men and couples another chance at parenthood, within their

means and with assurance that the procedure will yield results.

"I believe that family planning initiatives have ruined an entire generation by completely choking off the lives that would have otherwise been brought into this world," says Dr. Hickman. "Vasectomy procedures are leading men astray, taking away their God-given gifts, and straddling them with a life of regrets. I know because I have talked to countless men who say they lost a part of themselves after the vasectomy procedure. My mission, driven by my belief in God, is to give them back the most precious gift that He intended for humans to have. If you are still wondering, is it possible to reverse a vasectomy, I urge you to call my office and schedule a consultation."

Dr. Hickman is an active member of his church and is involved with and passionate about the Men's ACTS Retreat Ministry. He also currently serves on the Apostolate Board for the North American Province of the Missionaries of the Holy Family and on the Board of Directors of TIPHER (The Institute for Public Education, Health, and Research).

Dr. Hickman offers two all-inclusive affordable vasectomy reversal options. The microsurgical vasectomy reversal cost option of \$3,300 includes local anesthesia and an oral sedative. The \$4,200 offer is performed under IV sedation and is administered by a Board Certified Anesthesiologist. Both microsurgical options are all-inclusive with no hidden fees.

Over the years, patients from all over the United States have thanked Dr. Hickman for helping them successfully reverse a vasectomy. In their testimonials, patients talk about the caring and compassionate care they received with Dr. Hickman, his responsive and helpful staff, and the effective results that he was able to deliver.

One patient talks about their experience undergoing a vasectomy reversal with Dr. Hickman by saying, "Like many men in this world, I made the grave mistake of eliminating God's gift of creation through a vasectomy. That was roughly 23 years ago. My heart told me it was wrong at the time, and I suffered the consequences of sterility in many different ways. When my wife and I decided it was time to put things back into God's hands, we turned to Dr. Mark Hickman in New Braunfels, TX. Although we reside in the Denver area, we could see that a trip to TX was the work of the Holy Spirit."

The testimonial continues, "We were at complete peace before, during, and after the procedure thanks to the spirituality of Dr. Hickman and his staff. Although there are no real statistics for success regarding a reversal after so many years, the odds were not in our favor. However, the procedure went well, and the good Lord has blessed us with another pregnancy! After 52 years of life, over 23 years of sterility, and 4 children from my younger days, I'm thankful both for God's blessings in our lives and for His blessings in the steady hands and talents of Dr. Hickman and his staff!"
