IMSource.org, an online business that looks into online marketing products, has recently started to promote the KMoneyMastery program. This program has been designed to enable people to make money through Kindle eBooks. IMSource is very excited about this opportunity and encourages everyone to sign up for it.

Greg Jeffries, the brains behind IMSource.org, says: "In a nutshell, KMoneyMastery is a course that teaches ordinary people how to create a simple, scalable and sustainable online passive income stream through Kindle publishing. While a lot of people will think that this is not for them, as they wouldn't know how to write a book, we really encourage them to consider it anyway, as even that is explained to them in the system."

The Kindle marketplace has proven to be incredibly popular with people who want to self publish their books. The Kindle Direct Publishing account is completely free to sign up for and enables people to upload their books onto the platform. It is a fully automated system that enables people to upload their eBook, cover picture and more, after which Amazon reviews it and publishes it on the platform within about 24 hours. They then pay up to 70% for every sale, which means there is a huge earning potential to be enjoyed.

KMoneyMastery is a program that is designed to teach people how they can get a book written and how to fully automate the entire process. Those who sign up for it, once completing the tutorial, will realize how easy it is to make money from Kindle ebooks. This is why IMSource recommends it, as it does not actually require anybody to be a proficient author, nor do they need to be knowledgeable about internet marketing, as Amazon does all that work for them.

"It really is a done for you process," adds Greg Jeffries. "KMoneyMastery shows people how to outsource their writing and the Kindle platform does everything else for them. The income potential is truly tremendous."
