

Bay Clinic of Chiropractic & Dr. Tony Salamay Introduce Chiropractic Neurology To Local Residents

May 10, 2023

Panama City, FL - May 10, 2023 -
The Bay Clinic of Chiropractic, based in Panama City, FL, is pleased to share that it provides patients access to all the benefits supported by Chiropractic Neurology. This field represents nothing less than a brand new era in the field of medicine and chiropractic, and the clinic is eager to help patients discover what is now possible thanks to recent advancements.

Chiropractic Neurology is primarily a preventative technique, practiced at the Bay Clinic of Chiropractic by Dr. T. Salamay. As with other types of holistic treatment, this field avoids the use of drugs or invasive surgical procedures, but it can help treat a variety of conditions, such as those which affect the spine, nervous system and brain functionality.

The spine, nervous system and brain are often where much of the body?s ailments begin. As such, the source of many conditions can be traced back to these areas, and Chiropractic Neurology takes advantage of this fact by providing advanced and structured treatment. According to Dr. Salamay, treatment can alleviate

headaches, learning and attention disorders, autism, dyslexia , a range of conditions that cause chronic pain and so on. These methods are known for being far more safe and effective than more conventional counterparts which rely on drugs and surgical intervention.

Those who have visited the clinic for a chiropractic adjustment may find it easier to recognize the basic mechanism behind Chiropractic Neurology. According to the clinic, it seeks to enhance both nerve connection and balance, which in turn promotes overall function. This leads to shorter recovery times (following injury and so on) and a stronger baseline of health.

The Bay Clinic of Chiropractic points out that the chiropractic field is by no means the sole benefactor of the benefits offered by Chiropractic Neurology. In fact, the medical field is now teeming with professionals who recognize what it offers their patients, and it is not uncommon to find physicians, neurologists, neurosurgeons and orthopedic surgeons becoming board-certified in Chiropractic Neurology.

In recent years, there has been a growing trend among medical professionals to attempt procedures that are as minimally invasive as possible before resorting to drugs, surgery and so on. To this end, the natural conclusion is to become adept at techniques that also offer great results, and Chiropractic Neurology is considered the answer many have been waiting for.

The most important aspect of a clinic?s work, it can be argued, is the results it achieves with patients. While it is easy to make promises, keeping them is a far more difficult task, and only the top providers are realistically able to deliver. In healthcare, this means that a patient?s well being is on the line at all times, and this is a fact that the clinic is highly cognizant of.

As such, those who consider the clinic today will be pleased to learn that it has earned a strong reputation for conscientious service. ?Best chiropractor and functional medicine doctor I?ve ever been to!? says one review. ?I no longer suffer with fibromyalgia, Dr. Salamay has given me my life back. He has helped me tremendously with his type of adjustments and nutritional protocols ? nutrition response testing ? that he uses as part of his functional medicine program. I had resigned myself to my condition because everyone I have been to, told me that there is no real solution. Dr. Salamay always gives you the necessary time without making you feel rushed. Awesome doctor. His office staff are amazing too. Highly recommend Dr. Salamay.?

An excerpt from another review says, ?Fantastic staff and professional care! I recently moved, and my previous doctor in another state referred Dr. Salamay. The treatment to date has exceeded my expectations. Dr. Salamay quickly got to the root of the problems and brought me to a relatively pain-free existence in a few months.?

Dr. Tony Salamay and the rest of the team at the Bay Clinic of Chiropractic are eager to bring Chiropractic Neurology to residents in Panama City and beyond. Those interested are welcome to contact the clinic by phone or email to learn more.
