

Back Pain Relief Coccyx Cushion Now Available Online

December 08, 2015

December 08, 2015 - PRESSADVANTAGE -

Liliyo is pleased to announce that their Coccyx Cushion from Liliyo is now available to view online. The donut pillow that has been clinically tested to determine its effectiveness in relieving what seemed to have become chronic pain in the lower back - around the sacrum area for many people - can currently be purchased from Amazon and delivered safely to their doorstep.

Liliyo notes that scientists have proven that over 90 percent of sacrum pain is as a result of surfaces that people sit on. Car seats, office chairs, and park benches can all cause discomfort in the lower back. With the Coccyx cushion however, the contact between a person's tailbone and the surface they are seated on is cushioned by the donut pillow to prevent pressure being put on the bone and the spinal code which causes the common back pain problem.

The company spokesman notes that this cushion is revolutionizing the entire seating experience. "There is no reason anymore for seating to be a pain in the butt," he said, adding that this product will also be very useful for pregnant women as well as women who have recently given birth.

Many of the people who are already using this product have nothing but praises for it. "I have been using this car cushion for months as I drive a truck long distance, it works just as they say it does, it feels like sitting on

a cloud,? Ron says.

Ron is just one of very many satisfied customers who have used and continue to use the Coccyx cushion.

Customers can see the product from Amazon.com, and a video about the product can be found at <https://www.youtube.com/watch?v=781-a0Hj640>.
