Blinge!: Jacksonville Florida's Premier Outdoor Lighting Company

May 23, 2023

May 23, 2023 -
Blingle! of Jacksonville Florida offers bright, safe, and innovative outdoor lighting services. Whether preparing for an outdoor event or looking to brighten your home, Blinge! Jacksonville Florida offers premier outdoor lighting services.

?I started Blingle here in Jacksonville, Florida to harness my passion for building businesses and enriching the lives of people within my community,? says Dipak Rajhansa, Owner and Operator of Blinge! of Jacksonville, Florida. ?Reach out to us for your customized computer-based lighting demo for your home, business, and events. Jacksonville is a vibrant community with a bright future, and Blingle! of Jacksonville hopes to make it even brighter.?

After helping grow multiple companies to liquidity events, Rijhansa stepped off the corporate treadmill to a lifelong dream of being a small business owner. Out of the office, Rijhansa keeps busy with sportfishing, playing beach volleyball, golfing, skiing, and playing pickleball. He also loves rooting for the St. Louis Cardinals and his hometown Jacksonville Jaguars. Visit web site to learn more about Blinge! and its owner.

Blinge! Is a nationally-backed premier lighting service provider that specializes in landscape, patio, holiday, event, permanent home exterior, and commercial lighting services. From a permanent home exterior design to a holiday event, all Blinge! clients can expect services ranging from design consultations to take-down services.

The company offers a wide variety of lighting options for homes, corporate buildings, and outdoor parties and events, including low voltage LED lighting, residential lighting, dock lighting, landscape lighting, string lighting, deck outdoor living lighting, and more.

Blingle uses only LED lighting, which is long-lasting and energy efficient, to ensure that the environment stays well lit for a long amount of time. They also focus on lighting that is bright enough to provide good visibility, but not so bright that it creates harsh shadows or glare. The color of the lighting is warm and inviting, creating a pleasant atmosphere while also making it easier to identify people and objects.

The lighting contractors are also very particular about their lighting positioning and strategically place lights to illuminate the natural light levels in a particular space. They use lighting to enhance and supplement these levels. Lights are also carefully distributed throughout a space to ensure a well lit environment.

Working with Blinge! is simple. All clients start with a design consultation with one of Blinge?s light consultants and designers. These consultations can be done in-person or virtually. This collaboration session allows the company to assess the project size and the client?s needs.

The premier lighting company will then offer a lighting demo, which helps clients envision and customize their final lighting plans. Lighting demos use first-rate technology to provide a digital representation of the property or project.

After a written proposal is created and agreed upon, Blinge will take care of the rest of the project including scheduling, installing, and take down (if needed). Visit company website to learn more about Blinge Premier Lighting rates and services or to see past projects, before and after photos, and more.

Before working with Blinge!, homes and buildings can have dark shadows and blind spots that don?t look flattering and could increase chances of criminal activity. After working with a Blinge! landscape lighting designer, buildings no longer have shadows and look welcoming and bright.

Blinge! understands that parties and outdoor events are also transformed with the right lighting. This is why design specialists are always around to answer questions and offer suggestions on outdoor (or indoor) event lighting techniques.

The company ensures quality, offering both workmanship warranties and product warranties on all of their services. If takedown services are needed, Blingle promises installation, takedown, and storage services, with post-Christmas lighting takedown beginning in early January.

Blinge! also offers a No Lights Out Guarantee. This guarantee ensures that all client?s lights will stay bright. If a light goes out, a specialist will be out within 48 hours to repair or replace it.

The lighting company serves Jacksonville, Florida and has been featured in neighborhoods all around the area. To learn more about their rates, security measures, and services, contact them at (940) 289-5543 or visit the company directly at their address.
