# New Century Service Launches Updated Website for MN HVAC Contractor Services

*May 26, 2023*

May 26, 2023 -
New Century Service, a company based in Corcoran, MN, is pleased to announce the launch of their updated website for their Minnesota HVAC services. They offer installation, repair, and maintenance services for heating, cooling, air conditioning, and furnace systems. The HVAC system is vital for air quality and air flow inside the home or building. They also provide plumbing services, electrical services, and drain cleaning services, in addition to their heating and cooling services.

A spokesperson for New Century Service says, ?Are you tired of feeling left in the cold when searching for heating and cooling services? Luckily, most HVAC companies offer heating maintenance, repairs, and installations. While repairs can vary depending on the issue, maintenance is usually a simple checklist that professionals follow. Stay stress-free by finding a reliable HVAC company for all your heating and cooling needs. For over two decades, the team at New Century Service has been dedicated to serving the Northwest Suburbs of the Twin Cities with top-notch HVAC services. Whatever the task, New Century Service is committed to making the experience as seamless and stress-free as possible.?

As the summer season approaches, homeowners and business owners will have to contend with the heat and it would not do to have a malfunctioning air conditioner. Deciding whether to replace or repair an existing air conditioning unit may not be an easy one. One way to make the process easier is to hire the services of an air conditioning specialist. They can provide a lot of help in simplifying the process of making decision whether to repair or replace the AC unit.

According to NCS, there are a number of key factors to consider when trying to decide whether to repair or replace an air conditioner. The first important factor is the age of the AC unit. If the unit is no longer functioning properly and it is less than 10 years old, it may be a good idea to consult with a professional. The nature of the problem and whether the warranty is still valid will be two factors that will play an important role in deciding whether to repair or replace. However, if the AC unit is already more than 10 years old, it may be

a good idea to replace it with a more cost-effective and energy-efficient unit.

Naturally, cost will play a significant role in the decision making whether to fix or replace the AC unit. Having it repair will typically be less expensive than buying a new unit. However, if the repair cost is projected to reach 40 percent or more of the price of a new unit, it may be more cost-effective to buy a new unit, especially one that is more energy efficient.

Another key factor is the efficiency of the existing unit and its seasonal energy efficiency ratio (SEER) rating. Newer models with a rating of over 15 can potentially save hundreds of dollars on energy costs, which means getting a brand new unit may be more advisable.

A fourth key factor is whether the existing AC unit has been failing quite often, resulting into frequent repairs. In such cases, it would make more sense to buy a new unit rather continuing to use the existing unit.

Founded in 2000, New Century Service has been providing HVAC, plumbing, and electrical services to thee northwest suburbs and neighboring areas of Twin Cities for more than 22 years. The company is locally owned, and their experienced and dedicated staff have helped them develop the reputation of being the area?s reliable home and commercial HVAC service providers. Their expert staff will always focus on finding the root cause of the problem to ensure that the homeowner or property owner will be able to make an informed decision and avoid premature replacements and expensive repairs. Their service area includes Corcoran, Hamel, Plymouth, Elk River, Medina, Minnetonka, Medicine Lake, St. Michael, Victoria, Rogers, Wayzata, Waconia, and other nearby cities.
