

Cicoria Tree and Crane Service Offers Tree Trimming and Pruning Services

May 25, 2023

May 25, 2023 - PRESSADVANTAGE -

Cicoria Tree and Crane Service, Inc., a tree service company based in Beverly, MA, wants to emphasize their tree trimming and pruning services for the North Shore of Boston and Essex County. The team at Cicoria is made up of certified arborists and applicators, including a master arborist board certified by the International Society of Arboriculture (ISA). They are Better Business Bureau (BBB) approved and have a high overall rating on Google, which is 4.8 out of 5 stars after almost 120 customer reviews.

One five star review they would like to highlight is from Jeffrey P. who gave them a five star rating and said, "Used them several times over the years and have always had great service. Have trusted what the arborist recommends because he doesn't push things that aren't needed. and the crews have done an awesome job including a great job cleaning up. will use them again."

Tree trimming and pruning can offer a number of benefits including health, structure, appearance, function and safety. The Cicoria team will be providing pruning and trimming services using the experience and

knowledge of their certified arborists and the most advanced equipment and tools available. There are five good reasons to trim or prune a tree. One good reason is the health of the tree because dead branches can impede the growth of healthy parts of the tree. A tree with branches that are sickly or starting to droop, will take up space and resources. Trimming or pruning them can allow newer branches to grow and strengthen the roots.

Another good reason for trimming or pruning is to prevent or get rid of disease. The process, with the guidance of expert arborists, will get rid of any branches that have been infected by disease, fungi, and other kinds of decay. This prevents the disease from spreading to other branches and other parts of the tree. Trimming some branches of the tree will also allow more sunlight to pass through and allows for better air circulation, which can help in decreasing the incidence of disease.

A third reason for trimming or pruning is to promote fruit production. Getting rid of rotted and dead branches can encourage fruit production in fruit trees. It will tend to have more fruits because it is less vulnerable to disease.

A fourth reason for pruning or trimming is that rotted and dead branches can pose significant risk for the property and people. That particular branch can easily break when there is a strong wind, which can hit people or other parts of the property. These broken branches may also hit electrical wires and cause brownouts.

Finally, trimming or pruning trees can allow for a better view of the surroundings. It is particularly beneficial for those who have fantastic views of their surroundings, such as those who live by a lake, who have an astounding view of the mountains, and more. Pruning can also enhance the aesthetic appearance of the trees.

Initiated in 1981, Cicoria Tree and Crane Service, Inc. is a family owned and operated tree service provider based in Beverly, MA. Their team of tree care experts always strives to provide the best services. Currently, they have delivered their services to thousands of residents of the North Shore area in Massachusetts, and they are the only independent tree care provider in the area with a Tree Care Industry Association (TCIA) Accreditation. The TCIA Accreditation is a third-party consumer confidence verification program with the purpose of making it easy to look for qualified tree care providers. They always make sure their services are in accordance with the standards set by the ISA, the American National Standards Institute (ANSI) A-300 Standards, and the Massachusetts Arborist Association (MAA).

Those who are interested in learning more about the services offered by Cicoria Tree Service can visit their

website or contact them on the phone or through email. They can be contacted 24 hours a day, at any day of the week.
