May 31, 2023 -

Phoenix Home Remodeling, an award-winning home remodeling contractor in Chandler, AZ, wants to emphasize their Chandler shower remodeling services. They want to emphasize that investing in a shower remodel is a good decision for homeowners because of its many benefits, especially with regard to improvement in aesthetics and several functional benefits. The shower remodeling services offered by Phoenix Home Remodeling include all of the construction, along with advice on selecting the appropriate tiles, plumbing requirements, and choosing everythign involved in a shower renovation.

Jeremy Maher, co-owner of Phoenix Home Remodeling, says, ?We are committed to using only the highest quality materials meant to last, guaranteeing that your shower will remain in excellent condition for years. We also prioritize craftsmanship during the shower remodeling process. Our team of experienced professionals has the skills and expertise to ensure that every aspect of your shower remodels is completed with precision and attention to detail. We take great pride in our work, whether we're installing new fixtures or replacing old tiles. We are dedicated to providing our clients with exceptional results, no matter the project size or complexity.?

Phoenix Home Remodeling has developed the reputation of being a provider of the best shower remodels in Phoenix as a result of their expertise, their careful attention to detail, and commitment to not skipping steps. Jeremy Maher says, ?Showers are so risky that some home builders do not warranty tile showers on 2nd floors and they make homeowners sign a waiver. We will not touch another contractors partially finished shower, so we have to remove what is currently there and start over. This unfortunately is common in the Phoenix area.?

One of the most risky parts of having a shower remodeled is a contractor missing or skipping a step. This is because it could mean having to redo the whole or most of the shower remodeling project. Sometimes the presence of leaks can also result in the need for a whole new bathroom remodel. If there is a leak, the problem is determining where the leak is coming from, while having to deal with the damage caused by the leak in other parts of the home. In addition, it will likely require ripping of all of the newly installed tiles, cement board, and other items. Then, the homeowner may need to invest in a whole new shower. The problem is that homeowners insurance typically covers only a little or none of the expenses. To avoid such a problem, it is advisable to follow a certain number of key steps

Before proceeding to the first step, it is important to visualize first what the new shower would look like. The first step is to prepare the space that is needed for the shower remodel. The second step is to remove all of the shower fixtures and items. The hot and cold water supply lines should be capped to allow water to supplied to the other parts of the home while the remodeling is ongoing. The remaining steps are: removal of current shower stall; framing; plumbing changes and upgrades; substrate installation; cement boards for shower walls; installing the shower floor; substrate preparation and waterproof elastomeric membrane; shower floor tile installation; shower wall tile installation; shower wall edge trim; grouting and clean-up; glass measure and installation of plumbing fixtures; and installation of glass.

Started in 2017, Phoenix Home Remodeling came out as a result of co-founder Jeremy Maher?s disappointing experiences with contractors in the past. With a mission to offer much better contracting services, their local staff are all experts in bathroom, kitchen, and whole home remodeling, and they guarantee premier workmanship and a remodel that is really attractive. They are capable of delivering different kinds of home improvement services, including: demolition of all items being removed; building a new wall or removing a wall; planning all aspects of the remodel; new countertops; new backsplash and other tile work; new cabinets; new windows; new doors; new lighting; new showers; bathroom remodeling; new flooring; laundry room remodeling; entertainment wall remodeling; kitchen remodeling; and more. They can provide remodeling services in Chandler, Sun Lakes, Ahwatukee, Mesa, Laveen, Tempe, Gilbert, and Phoenix South Mountain.
