

Pasadena Surgeons Completes Highest Number of Cosmetic Surgeries in Its History in 2015

December 15, 2015

December 15, 2015 - PRESSADVANTAGE -

Pasadena Surgeons, a cosmetic surgery clinic in Pasadena, CA, is proud to announce that they have completed the most number of cosmetic surgical procedures in its history during 2015. In the past 18 months, Dr. Shankar Lakshman performed close to 300 abdominoplasties, commonly referred to as a Tummy Tuck. All patients reported excellent results. These outcomes are a true testament to the quality of the procedures the team completes.

The tummy tuck is a core element to the Pasadena Surgeons Mommy Makeover. "Mommy makeovers are now very common with many women's desires to maintain their younger-looking, pre-pregnancy figures," says Dr. Lakshman from Pasadena Surgeons. "We are experts who deliver a safe, efficient solution for women that can make a big impact on the way a woman looks and how she feels about her body image."

"I absolutely love my new look," says Sharon T. "I had lost a significant amount of weight after pregnancy, and the flabby mommy look was not what I was aiming for. Dr. Lakshman and his team transformed me from

flabby mommy to yummy mommy, and I couldn't be happier."

The tummy tuck is a foundational procedure for most body related cosmetic procedures. The concept is that to build a great house, you have to start with a solid foundation. Abdominoplasty is one of the foundational procedures. Tummy tucks, mommy makeovers, and Pasadena Surgeons Brazilian Butt Lift have a number of great benefits including a sleeker, more feminine form, and a younger-looking body. An important benefit is that Pasadena Surgeons now provides better and more repeatable results than ever before, which creates an unprecedented level of quality and safety.

Patients at the clinic have hailed the fact that they experienced much shorter recovery times than expected. Dr. Lakshman is in the process of incorporating this world class experience into a book for patients interested in the procedure. This book is due for release in 2016.

The clinic is also running the 'New You for a New Year' promotion. This opportunity is a way for people to transform their physical appearance for the look they have always wanted at a significantly reduced price. Full details about the promotion are available through www.PasadenaSurgeons.com.
