

Woman Praises Muse Treatment in Los Angeles for Amazing Staff

June 08, 2023

LOS ANGELES, CA - June 08, 2023 -
Los Angeles, California?A former client of Muse Treatment Center has enthusiastically praised the center?s staff in a five-star review on Google.

?The staff is absolutely amazing!!!? wrote Pammie, the former client, calling out staff members who ?go above and beyond and ensure all clients are well taken care of.?

Pammie isn?t the first or the only person to credit the Muse Treatment staff for helping them to achieve sobriety. The Muse staff is a team of accredited and experienced experts who are attuned to the unique needs of each client and design a customized treatment program for each individual. They work with a variety of medical professionals and addiction specialists who make clients? recovery their top priority. Most importantly, the staff is understanding, compassionate, and supportive at every step of the journey.

Their expertise informs a comprehensive approach to addiction recovery, from detox to aftercare and alumni

services when treatment ends. The team includes relapse advocates available 24/7 to help clients struggling to stay sober. They also offer guidance in stress reduction skills and the opportunity to incorporate any aspect of our program for as long as the client wants or needs.

With locations throughout Los Angeles and Southern California, Muse is a safe haven for recovery from substance abuse and other mental health disorders. The basis for its success stems from its community-oriented program. The strengths and goals of the community are dynamic?created and developed by each participating individual.

The Muse intensive outpatient program is an active and engaging community with constant recovery-oriented activities. Clients enjoy a unique variety of services, including art therapy, yoga, cardio workshops, cognitive training, neurofeedback, biofeedback, cognitive-behavioral therapy, group therapy, and many others. Because of the diversity of its programming, Muse guarantees that each and every client will have the opportunity to forge a new life.

Treatment is customized for the individual, but the overall program is a four-phase process that takes the client from detox to recovery.

In Phase 1, the individualized treatment plan is created for the client?s unique and specific needs. A multidisciplinary, integrated approach is employed using several treatment modalities. Some examples of such plans include short and long-term goal setting, educational interventions, awareness building, sponsorship, and community support.

Phase 2 is Muse?s evidence-based treatment program that encourages each client to express his or her own truth and authenticity. This phase of the program supports a major behavioral shift in which the client can experience rapid growth, often developing healthy interpersonal relationships, achieving short-term goals, and sustaining self-regulation and self-direction.

In Phase 3, the aftercare program offers a support mechanism that fosters continued growth and allows for both positive and negative real-life experiences to occur. Muse uses previous treatment plans as well as day-to-day client input to create a dynamic, constantly evolving plan for aftercare that allows each individual to remain safe while engaging in his or her own recovery.

In Phase 4, clients identify their interests and goals and learn to recognize the behaviors required to accomplish them. Many clients pursue vocational or educational goals while maintaining active enrollment in Muse?s alumni and aftercare programs.

Personal support is a critical part of this formula for success., and the Muse team does ?go the extra mile,?

as Pammie notes, to make sure every client has the opportunity to succeed. Muse is one place where people truly do make a difference.

Muse Treatment offers a comprehensive treatment of alcohol dependence or other substance use disorders. For help or more information for the patient or a loved one, visit or call 866-634-6111.
