

Miami Company Launches New Artificial Grass Installation Service

December 11, 2015

December 11, 2015 - PRESSADVANTAGE -

M3 Artificial Grass & Turf Installation Miami has announced that it is providing artificial turf to Florida residents. The company aims to serve South Florida with two locations, Miami and Fort Lauderdale, to help them offer their services to the Miami-Dade, Broward, and Palm Beach counties area.

J.C. Mereles, spokesperson for the company, explains, "There are many advantages to having artificial turf over traditional grass in your yard and many homes in South Florida can benefit from these. Artificial grass lowers maintenance costs, reduces the number of bugs in the area, is pesticide free, saves water, increases playability, stays beautiful for many years, and does not change color or die."

Mereles says that many consumers believe artificial grass is for sporting arenas and other similar properties, but this is no longer the case. "It's not just for sporting areas or golf putting greens, but many are installing for the pet artificial turf eliminating brown spots, in playgrounds, landscaping, swimming pools, rooftops, balconies, and terraces too," he says.

Mereles explains that less costs and less hassle are key benefits from having synthetic grass installed in

residential properties. For many homeowners, it can provide a more manageable landscape that is also less expensive to maintain. The company offers installation of artificial turf, with a number of options regarding type and color. Mereles adds that aside from having lawns that are easier to maintain, homeowners will benefit from long-lasting lawns, compared to traditional ones.

The company points out that this new artificial grass offers a more affordable option for many homeowners. Mereles says that the installation cost is offset by the elimination of the typically high fees paid for lawn maintenance to a grass cutting service. Homeowners also do not need to purchase lawn mowers, weed eaters, and other similar equipment in order to maintain their lawns. Overall, the company stresses that the cost is reduced, and that artificial grass can provide a much longer lasting and more attractive option than traditional grass seeding and growing, for homes and businesses.

Home or business owners interested in learning more about M3 Artificial Grass & Turf Installation Miami and their selection of fake grass can visit the company on their official website.
