

Dentist In Walton-on-Thames Offers Cosmetic Dental Treatments Affordably

June 14, 2023

June 14, 2023 -

Walton Dental Surgery, a reputable private dental practice in Walton-on-Thames, is glad to announce the availability of two innovative treatments: Invisalign teeth realignment and dental implant treatment. These advanced procedures are intended to improve smiles and oral health, providing patients with a variety of advantages not covered by the NHS.

For more information on the dentist in Walton-on-Thames visit: https://waltondental.co.uk.

With its invisible and comfortable aligners, Invisalign, a revolutionary teeth-straightening system, has revolutionised the orthodontic industry. In contrast to traditional metal braces, Invisalign aligners are essentially invisible, making them the ideal orthodontic option for those seeking discretion. Each patient's aligners are custom-made to ensure a precise and comfortable fit. With Invisalign, patients can straighten their teeth without the inconvenience of retainers and wires. In addition, the aligners are removable, allowing for simple oral hygiene maintenance and unrestricted consumption of favourite foods. The experienced team

of dentists at Walton Dental Surgery is committed to assisting patients in achieving their desired appearance while providing exceptional care and support throughout the treatment process.

People interested in a teeth-straightening treatment with Invisalign can actually see a computer simulation of their future smile by just submitting a selfie of their smile by going to this page on the Walton Dental Surgery website: https://waltondental.co.uk/invisalign/.

Dental implants are yet another innovative service provided by Walton Dental Surgery. This treatment offers individuals with missing teeth a permanent solution that appears natural. Dental implants, unlike prostheses or bridges, are a permanent solution that restores both the functionality and aesthetics of a patient's smile. The implant is surgically implanted into the mandible to serve as a stable base for a replacement tooth or crown. Implants not only improve the appearance of the smile, but they also prevent bone loss, preserve facial structure, and improve oral health overall. Walton Dental Surgery ensures that patients receive the highest level of care throughout the entire dental implant procedure by utilising their knowledge and cutting-edge technology.

In addition to providing these exceptional services, Walton Dental Surgery is dedicated to making dental care accessible and affordable for all patients. The practise offers a comprehensive dental plan that provides discounts and benefits on routine dental care, such as checkups, cleanings, and fillings. This dental plan enables patients to maintain their oral health through preventive care, identifying and resolving any potential problems promptly. With the dental plan, patients can receive necessary treatments and experience substantial savings, making high-quality dental care accessible to all.

Dr. Gurmeet (Gary) Pahuja and Dr. Kunal Pareek (KP), the principal dentists at Walton Dental Surgery, conveyed excitement regarding the new services, stating that they are thrilled to offer Invisalign and dental implants to their valued patients. These cosmetic dental treatments have the capacity to enhance lives and transform smiles. They vouch that their dedicated team is committed to providing patients with exceptional dental care while maintaining affordability and accessibility.

For more information on the Invisalign treatment, dental implants, cosmetic dentistry or dental membership plan offered by Walton Dental Surgery, please visit their website at the links provided above or simply call and get all the information you need from the helpful staff at 01932 225748.
