

Orthopedic Foot & Ankle Center Announces Updated Website Redesign

September 25, 2023

September 25, 2023 -
Orthopedic Foot & Ankle Center, a specialized orthopedic clinic with several locations throughout Central Ohio, has announced the launch of its newly redesigned website.

The website refresh makes it easier for patients to browse through the several high-quality orthopedic services that the clinic provides, such as ankle replacement, bunions, sports medicine, trauma care, lower extremity care, reconstructive surgery, physical therapy, Foot Source MD retail, diabetic foot care, wound care, diagnostic services, and more, as well as a complete list of foot and ankle conditions that its doctors can provide treatments for.

Moreover, Orthopedic Foot & Ankle Center has also created a dedicated Patient Information section on its website where patients can find out what to expect after booking an appointment, get the forms they need to fill out ahead of time, get information about post-surgery rehabilitation, have their payment and insurance questions answered, and explore the clinic?s EPAT® (Extracorporeal Pulse Activation Technology) treatment.

Orthopedic Foot & Ankle Center?s Practice Director, Pete Couch, shared the exciting news on its Google Business page by saying, ?This launch embodies our commitment to ensuring our patients and online visitors have access to the most accurate and up-to-date medical information, aiding them in making informed decisions about their healthcare. The newly launched website has been designed to be a reliable platform where we share high-quality, comprehensive content related to foot and ankle health. It aligns with our mission to educate, inform, and facilitate the best patient care possible in the realm of foot and ankle medical services.?

To help inquiring patients get familiar with the clinic?s highly qualified providers, Orthopedic Foot & Ankle Center has created detailed profiles for them on the new website. The profiles document each provider?s qualifications, illustrious work history, specialties, contact details, the locations they serve, and verified testimonials that they have received over the years from their patients. The profiles also link to their most recent publications in the field of orthopedics.

Patients can easily request an appointment at any of its locations across Central Ohio including Worthington, Dublin-Bradenton, Grove City, Dublin-Perimeter, Clintonville, Gahanna, and Zanesville by filling out a contact form. Patients can submit their contact information, select their preferred provider, and describe their current condition with any relevant information. The newly redesigned website also allows returning patients to refer others to the practice or pay their invoices through easily accessible links on the main menu.

When it began operations in 1998, Orthopedic Foot & Ankle Center was the first practice in the region dedicated to specialized foot and ankle care. To date, it has completed over 45,000 successful surgeries and has a rich track record of giving back to the local community it serves. The clinic is also a proud partner of OrthoAlliance, a network of orthopedic practices focused on expanding patient access to expert clinicians and best-in-class orthopedic care.

Orthopedic Foot & Ankle Center has received tremendous support from local patients over the past two decades. Hundreds of the clinic?s reviews talk about the helpful and supportive staff and their responsive customer service, the doctors who listen to all patient concerns with compassion, and its cutting-edge treatment options.

A review on the Google Business profile for its Worthington location, which has an impressive overall rating of 4.8 out of 5.0 from nearly 900 reviews says, ?My appointment was at 10:00, and by 10:05 I was with my doctor. Everyone was friendly, informative, and knowledgeable. [The doctor] took the time to check my feet, explain his opinion, and answer all my questions. The X-ray techs were a delight. The appointment was truly a wonderful experience, and I highly recommend Orthopedic Foot & Ankle Center.?

Another patient writes, ?[The doctor] and his staff took very good care of me. They took plenty of time to

explain to me what was going on with my feet along with the treatment that they were going to prescribe and the preventative maintenance that I could do to help prevent the problems from occurring again.?

Readers can get in touch with Orthopedic Foot & Ankle Center at (614) 895-8747 to request an appointment. For more information, follow its Facebook page at https://www.facebook.com/OFACColumbus.
